A MESSAGE TO OUR MEMBERS

We are pleased to present this 2018 Annual Report of Yosemite Farm Credit, ACA to you, our Members.

Financial Results

Your Association continues to thrive. Net earnings of \$65 million were strong as a result of growing loan volume, controlling expenses, and non-interest income from non-recurring items. The Association's capital remains strong, building a foundation for future growth and safeguarding against economic volatility.

Growth and Loan Quality

The amount of loans outstanding at year-end increased 10.5% exceeding \$3.0 billion. Credit quality remains strong. Commodity prices softened for several of our commodities, however land values remain strong. Impaired loans are at low levels of 0.9%.

Member Success

We appreciate being able to serve the outstanding farmers and ranchers in our area. Your ability to meet your loan obligations drive the success of your Association.

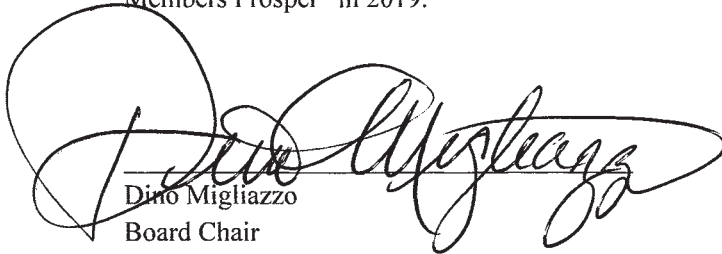

Patronage

We remain committed to returning earnings that are not necessary for the operation of your Association. Our earnings enabled the Association to declare a patronage dividend of \$21.9 million while continuing to provide competitive rates. We are ensuring that your Association remains a long term, reliable source of funds for agriculture while also providing competitive rates.

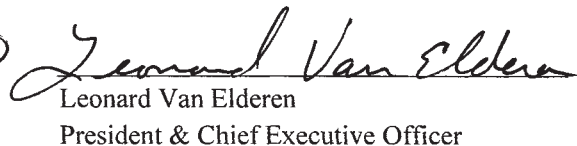

Service

Your Association is guided by a local Board of Directors that is focused on your financing needs. Yosemite Farm Credit delivers local service with an experienced staff that understands agriculture.

We appreciate the opportunity to serve our Members' financing needs and look forward to "Helping our Members Prosper" in 2019.

⁽¹⁾ Includes the allowance for loan losses and the reserve for unfunded commitments.

REPORT OF MANAGEMENT

The consolidated financial statements of Yosemite Farm Credit, ACA (Association) are prepared by management, who is responsible for their integrity and objectivity, including amounts that must necessarily be based upon judgments and estimates. The consolidated financial statements have been prepared in conformity with generally accepted accounting principles appropriate in the circumstances, and in the opinion of management, fairly present the financial condition of the Association. Other financial information included in the 2018 Annual Report is consistent with that in the financial statements.

To meet its responsibility for reliable financial information, management depends upon the Association's accounting and internal control systems, which have been designed to provide reasonable, but not absolute, assurance that assets are safeguarded and transactions are properly authorized and recorded. To monitor compliance, the Association's internal auditor and review team perform audits of the accounting records, review accounting systems and internal controls, and recommend improvements as appropriate. The Association is also examined by the Farm Credit Administration.

The Audit Committee of the Board of Directors has overall responsibility for the Association's system of internal control and financial reporting. The Audit Committee consults regularly with management and reviews the results of the examinations by the various entities named above. The independent auditors have direct access to the Audit Committee.

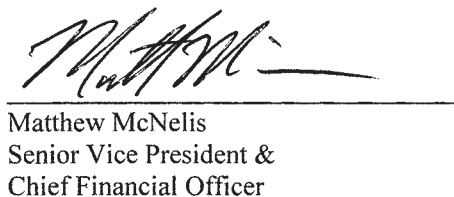

The undersigned certify that the Yosemite Farm Credit, ACA Annual Report has been reviewed and prepared in accordance with all applicable statutory and regulatory requirements, and that the information contained here is true, accurate, and complete to the best of our knowledge and belief.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Yosemite Farm Credit, ACA (Association) principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association's consolidated financial statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting information and the preparation of the consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America and includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association's assets that could have a material effect on its consolidated financial statements.

The Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of December 31, 2018. In making the assessment, management used the framework in *Internal Control—Integrated Framework (2013)*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Association concluded that as of December 31, 2018, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Association determined that there were no material weaknesses in the internal control over financial reporting as of December 31, 2018.

AUDIT COMMITTEE REPORT

The Audit Committee (Committee) includes five members from the Board of Directors of Yosemite Farm Credit, ACA (Association). In 2018, ten Committee meetings were held. The Committee oversees the scope of the Association's internal audit program, the independence of the outside auditors, the adequacy of the Association's system of internal controls and procedures, and the adequacy of management's action with respect to recommendations arising from those auditing activities. The Committee's responsibilities are described more fully in the Internal Control Policy and the Audit Committee Charter. The Committee approved the appointment of PricewaterhouseCoopers LLP (PwC) as the Association's independent auditor for 2018.

The fees paid for professional services rendered for the Association by its independent auditor, PwC, during 2018 were \$128,145 for audit services and \$11,800 for tax services.

The Committee reviewed the non-audit services provided by PwC and concluded these services were compatible with maintaining the independent auditor's independence.

Management is responsible for the Association's internal controls and the preparation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. PwC is responsible for performing an independent audit of the Association's consolidated financial statements in accordance with auditing standards generally accepted in the United States of America and to issue a report thereon. The Committee's responsibilities include monitoring and overseeing these processes.

In this context, the Committee reviewed and discussed the Association's audited financial statements for the year ended December 31, 2018 (the "Financial Statements") with management. The Committee also reviews with PwC the matters required to be discussed by Statements on Auditing Standards. Both PwC and the Association's internal auditors directly provide reports on significant matters to the Committee.

Based on the foregoing review and discussions and relying thereon, the Committee recommended that the Board of Directors include the Financial Statements in the Association's Annual Report to Shareholders for the year ended December 31, 2018 and for filing with the FCA.

YOSEMITE FARM CREDIT, ACA MANAGEMENT'S DISCUSSION AND ANALYSIS

INTRODUCTION

The following discussion summarizes the financial position and results of operations of Yosemite Farm Credit, ACA for the year ended December 31, 2018. Comparisons with prior years are included. We have emphasized material known trends, commitments, events, or uncertainties that have impacted, or are reasonably likely to impact the financial condition and results of operations. The discussion and analysis should be read in conjunction with the accompanying consolidated financial statements, footnotes and other sections of this report. The accompanying consolidated financial statements were prepared under oversight of the Audit Committee. The Management's Discussion and Analysis includes the following sections:

- Business Overview
- Economic Overview
- Loan Portfolio
- Credit Risk Management
- Results of Operations
- Liquidity
- Capital Resources
- Regulatory Matters
- Governance
- Forward-Looking Information
- Critical Accounting Policies and Estimates
- Customer Privacy

Our quarterly reports to shareholders are available approximately 40 days after the calendar quarter end and annual reports are available approximately 75 days after the calendar year end. The reports may be obtained free of charge on our website, www.yosemitefarmcredit.com, or upon request. We are located at 806 W. Monte Vista Ave., Turlock, CA or may be contacted by calling (209) 667-2366 during business hours Monday – Friday, 8 a.m. – 5 p.m. PST.

BUSINESS OVERVIEW

Farm Credit System Structure and Mission

We are one of 69 associations in the Farm Credit System (System), which was created by Congress in 1916 and has served agricultural producers for over 100 years. The System mission is to provide sound and dependable credit to American farmers, ranchers, and producers or harvesters of aquatic products and farm-related businesses through a member-owned cooperative system. This is done by making loans and providing financial services. Through its commitment and dedication to agriculture, the System continues to have the largest portfolio of agricultural loans of any lender in the United States. The Farm Credit Administration (FCA) is the System's independent safety and soundness federal regulator and was established to supervise, examine and regulate System institutions.

Our Structure and Focus

As a cooperative, we are owned by the members we serve. The territory served extends across a diverse agricultural region of California's Central Valley. The counties in our territory are listed in Note 1, "Organization and Operations," of the accompanying consolidated financial statements. We make long-term real estate mortgage loans to farmers, ranchers, rural residents and agribusinesses, and production and intermediate-term loans for agricultural production or operating purposes. The Association also serves as an intermediary in offering credit life insurance and multi-peril crop insurance and provides other related services such as advance conditional payment accounts and lease financing. Our success begins with extensive agricultural experience and knowledge of the market and is dependent on the level of satisfaction we provide to our borrowers.

As part of the System, we obtain the funding for our lending and operations from a Farm Credit Bank. Our funding bank, CoBank, ACB (CoBank), is a cooperative of which we are a member.

We, along with the borrower's investment in our Association, are materially affected by CoBank's financial condition and results of operations. The CoBank quarterly and annual reports are available free of charge by accessing CoBank's website, www.cobank.com, or may be obtained at no charge by contacting us at 806 W. Monte Vista Avenue, Turlock CA 95382 or calling us at (209) 667-2366 during business hours Monday - Friday, 8:00 a.m. - 5:00 p.m. PST. Annual reports are available within 75 days after year-end and quarterly reports are available within 40 days after the calendar quarter end.

Our online banking technology is provided by CoBank. Farm Credit Foundations, a human resource service provider for a number of Farm Credit institutions, provides our payroll and human resource services. We are a shareholder in Farm Credit Foundations along with other Foundations customers.

ECONOMIC OVERVIEW

For many years, agriculture experienced favorable economic conditions due to strong commodity prices, rising land values, and to a lesser extent, governmental support and multi-peril insurance programs. Because of this overall prosperity, our financial results have been positively impacted. Production agriculture, however, is a cyclical business that is heavily influenced by commodity prices. Labor costs and availability, water costs and availability, increased market interest rates, international trade agreements, adverse weather conditions and commodity price volatility can negatively impact the profitability of agriculture producers. The impact on the Association from these less favorable conditions was somewhat lessened by the generally strong financial condition of our agricultural borrowers.

For the last few years, dairy net income has remained at or below breakeven with milk prices close to or below the accrual based cost of production. California dairy farmers are expected to again be challenged by moderately low milk prices through 2019, with both supply increases and slowing demand for milk products. Despite decreases in record prices from 2014, tree nut price levels remain profitable for most of our Association's growers. Almonds are the leading agricultural crop in the San Joaquin Valley and the highest grossing export crop from the State of California. Indications are for continued profitability in 2019.

The fundamental advantages in the Association's territory are good soils, a climate well suited for a variety of crops, and relatively inexpensive irrigation water. While rainfall in the last three years has helped the availability and price of water, uncertainty on ground and surface water availability remains in much of the area we service. Pumping from wells, water transfers within and between districts and neighbors, and fallowing ground are some of the strategies available to members to mitigate drought

conditions. The Association will continue to make credit decisions based on the individual operation of each Member. Each situation is evaluated on its own merits. Surface and ground water regulations and availability will continue to cause uncertainty within our territory.

The Agriculture Improvement Act of 2018 (Farm Bill) was signed into law on December 20, 2018. This new Farm Bill will govern an array of federal farm and food programs, including commodity price support payments, farm credit, conservation programs, research, rural development and foreign and domestic food programs for five years through 2023. The new Farm Bill continues to provide support for crop insurance programs and commodity support programs, strengthen livestock disaster programs, and provides dairy producers with an updated voluntary margin protection program that will provide more flexibility to dairy operations. The Farm Bill also authorizes the production and marketing of industrial hemp in accord with state or federal regulations.

Many provisions of the Farm Bill will require the United States Department of Agriculture to develop rules and procedures to fully implement these authorities. The timing for the issuance of those rules is uncertain and has been impacted by the ongoing shutdown of portions of the Federal government.

LOAN PORTFOLIO

Total loans outstanding were \$3.006 billion at December 31, 2018, an increase of \$285.5 million, or 10.5% from loans at December 31, 2017 of \$2.721 billion, which was an increase of \$208.4 million, or 8.3% from loans at December 31, 2016 of \$2.512 billion. The increase in loan volume is a result of new loan requests for real estate mortgage and production and intermediate-term loans. The types of loans outstanding at December 31 are reflected in the following table (\$ millions).

	2018		2017		2016	
	Outstanding	Percent	Outstanding	Percent	Outstanding	Percent
Real estate mortgage	\$ 2,219.7	73.8%	\$ 2,049.4	75.3%	\$ 1,898.9	75.6%
Production and intermediate-term	602.9	20.1%	493.2	18.1%	414.6	16.5%
Agribusiness loans to:						
Cooperatives	21.3	0.7%	27.4	1.0%	32.6	1.3%
Processing and marketing	115.8	3.9%	107.9	4.0%	120.1	4.8%
Farm related business	44.2	1.4%	39.9	1.5%	43.1	1.7%
Rural residential real estate	2.1	0.1%	2.7	0.1%	2.8	0.1%
Total	\$ 3,006.0	100.0%	\$ 2,720.5	100.0%	\$ 2,512.1	100.0%

Real estate mortgage loans outstanding increased to \$2.220 billion, compared with \$2.049 billion at year-end 2017, primarily due to loan requests from existing members not specific to any commodity, net of loan payoffs. Long-term mortgage loans are primarily used to purchase, refinance or improve real estate. These loans have maturities ranging from 5 to 40 years. Real estate mortgage loans are also made to rural homeowners. By federal regulation, a real estate mortgage loan must be secured by a first lien and may only be made in an amount up to 85% of the original appraised value of the property, or up to 97% of the appraised value, if the loan is guaranteed by certain state, federal, or other governmental agencies. Under our current underwriting standards, we originate loans less than the regulatory limit of 85% of the appraised value of the property.

The production and intermediate-term loans increased \$109.7 million to \$602.9 million compared with 2017 loans of \$493.2 million, primarily due to loan requests from existing members not specific to any commodity, net of loan payoffs. Production loans are used to finance the ongoing operating needs of agricultural producers. Production loans generally match the borrower’s normal production and marketing cycle, which is typically 12 months. Intermediate-term loans are generally used to finance depreciable capital assets of a farm or ranch. Intermediate-term loans are written for a specific term, 1 to 15 years, with most loans being less than 10 years.

Total Agribusiness loans increased \$6.2 million to \$181.4 million compared with \$175.2 million at year-end 2017, primarily due to loan requests from new and existing members in the processing and marketing loan portfolio as well as growth in the Association’s Capital Markets lending group, offset by the sale of loan participations to mitigate risk. Agribusiness loans are made to benefit the throughput of agricultural goods to the marketplace. These loans consist of long-term mortgages on the facilities and equipment of a processor as well as short- and intermediate- operating lines of credit.

Portfolio Diversification

While we make loans and provide financially related services to qualified borrowers in agricultural and rural sectors and to certain related entities, our loan portfolio is diversified by loan and lease participations purchased and sold, geographic locations served, commodities financed, and loan size as illustrated in the following four tables.

We purchase loan participations and lease participations from other System and non-System entities to generate additional earnings and, in some cases, diversify risk related to existing commodities financed and our geographic area served. In addition, we sell a portion of certain large loans to other System and non-System entities to reduce risk and comply with lending limits we have established. These participations (both purchased and sold) provide a means to reduce the risk associated with large loans along with an opportunity to further diversify the risk associated with individual commodities.

The balance of participations purchased and sold as of December 31 is included in the following table (\$ millions).

	2018	2017	2016
Participations purchased	\$ 215.2	\$ 197.3	\$ 187.8
Participations sold	\$ 226.8	\$ 157.7	\$ 103.9

We have no retained subordinated participation interests in loans sold, or interests in pools of subordinated participation interests that are held in lieu of retaining a subordinated participation interest in the loans sold.

The geographic distribution of loans by county at December 31 is included in the following table. As previously mentioned, we purchase loan participations outside our territory which are included in “Other” in the following table.

	2018	2017	2016
Stanislaus	47.8%	47.3%	46.9%
Merced	34.4	32.7	33.7
San Joaquin	6.1	6.0	5.0
Madera	5.0	4.8	4.8
Fresno	1.0	1.4	1.8
Tuolumne	0.5	0.6	0.5
Other	5.2	7.2	7.3
Total	100.0%	100.0%	100.0%

The following table shows the primary agricultural commodities produced by our borrowers based on the Standard Industrial Classification System (SIC) published by the federal government. This system is used to assign commodity or industry categories based on the primary business of the customer. A primary business category is assigned when the commodity or industry accounts for 50% or more of the total value of sales for a business; however, a large percentage of agricultural operations typically includes more than one commodity. Commodities included in the portfolio as of December 31 are set forth in the following table.

	2018	2017	2016
Dairy	34.7%	33.9%	35.2%
Almonds	26.3	27.1	26.2
Fruit & Tree Nuts	7.2	6.9	6.6
Field Crops	5.4	6.1	5.4
Other	26.4	26.0	26.6
Total	100.0%	100.0%	100.0%

The “Other” category represents 55 loan commodities that individually do not represent a concentration of more than 5% of the loan portfolio.

We have a relatively diverse loan portfolio; however, our loan portfolio contains a concentration of dairy and almond producers as a reflection of the commodity concentration in our chartered territory. Repayment ability of our borrowers is closely related to the profitability of the commodities they produce or raise. If a loan fails to perform, restructuring and or other servicing alternatives are available. Our future performance would be negatively impacted by adverse agricultural conditions. The degree of the adverse impact would be correlated to the commodities negatively affected and the magnitude and duration of the adverse agricultural conditions to our borrowers.

In addition to commodity diversification noted in the previous table, further diversification is also achieved from loans to rural residents and part-time farmers, which typically derive most of their earnings from non-agricultural sources. These borrowers are less subject to agricultural cycles and would likely be more affected by weaknesses in the general economy.

Loans originated for less than \$250 thousand accounted for 6.3% of loan volume and 49.4% of the number of loans at December 31, 2018. Credit risk on small loans, in many instances, may be reduced by non-farm income sources. The table below details loan principal by dollar size at December 31 (\$ millions) for the last three years.

	2018		2017		2016	
	Amount outstanding	Number of loans	Amount outstanding	Number of loans	Amount outstanding	Number of loans
(\$ in thousands)						
\$1 - \$250	\$ 189.0	2,358	\$ 188.1	2,455	\$ 193.4	2,529
\$251 - \$500	329.9	899	310.5	848	289.3	788
\$501 - \$1,000	470.4	680	484.1	704	455.8	657
\$1,001 - \$5,000	1,480.2	763	1,353.3	693	1,259.7	640
\$5,001 - \$25,000	536.5	72	384.5	48	313.9	39
Total	\$ 3,006.0	4,772	\$ 2,720.5	4,748	\$ 2,512.1	4,653

We are not dependent on a single borrower or a group of large liability borrowers. The loss of any of these loans or the failure of any of these loans to perform would not adversely affect the portfolio and our future operating results given the portfolio asset quality, commodity diversity and collateral values underlying the portfolio. The top ten borrowers account for 8.7% of loan volume.

To manage portfolio credit risk the Association participates in a Federal Agricultural Mortgage Corporation (Farmer Mac) purchase commitment program. Under this program Farmer Mac agrees to provide a purchase commitment to purchase loans in the event of default. The amount of loans subject to these Farmer Mac credit enhancements was \$333.8 million at December 31, 2018, \$336.4 million at December 31, 2017, and \$195.0 million at December 31, 2016. Fees paid to Farmer Mac totaled \$1.3 million for 2018, \$0.9 million for 2017 and \$0.7 million for 2016 and are recorded in the Consolidated Statements of Comprehensive Income as a reduction of interest income.

Under Farmer Mac's purchase commitment program, we continue to hold the loans in our portfolio, and we pay a commitment fee to Farmer Mac to assume the balance of loans designated in this program in the event the loan becomes significantly delinquent (typically four months past due). If the borrower cures the default, we must repurchase the loan from Farmer Mac and the commitment remains in place. Farmer Mac purchase commitment program is further described in Note 4, "Loans and Allowance for Credit Losses," of the accompanying consolidated financial statements. Other than the contractual obligations arising from these business transactions with Farmer Mac, Farmer Mac is not liable for any debt or obligation of ours and we are not liable for any debt or obligation of Farmer Mac. For more information on Farmer Mac, refer to their website at www.farmermac.com.

Additionally, the Association has credit guarantees of approximately \$3.5 million with Farm Service Agency (FSA) at year-end 2018, \$4.2 million at year-end 2017 and \$3.8 million at year-end 2016. We use FSA guarantees to make loans to young, beginning, and small farmers, to reduce our risk on large loans, and to assist borrowers experiencing financial difficulties.

Credit Commitments

We may participate in financial instruments with off-balance-sheet risk to satisfy the financing needs of our borrowers. These financial instruments include commitments to extend credit. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in our consolidated financial statements. Commitments to extend credit are agreements to lend to a borrower as long as there is not a violation of any condition established in the contract. Commitments and letters of credit generally have fixed expiration dates or other termination clauses and may require payment of a fee by the borrower. The following table summarizes the maturity distribution of unfunded credit commitments on letters of credit and loans at December 31, 2018 (\$ millions).

	Less than 1 year	1 – 3 years	3 – 5 years	Over 5 years	Total
Commitments to Extend Credit	\$ 204.2	\$ 208.7	\$ 42.7	\$ 325.5	\$ 781.1
Standby Letters of Credit	\$ -	\$ 3.2	\$ -	\$ -	\$ 3.2

Since many of these commitments are expected to expire without being drawn upon, the total commitments do not necessarily represent future cash requirements. However, these credit-related financial instruments have off-balance-sheet credit risk because their amounts are not reflected on the Consolidated Statements of Condition until funded or drawn upon. The credit risk associated with issuing commitments is substantially the same as that involved in extending loans to borrowers and we apply the same credit policies to these commitments. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on our credit evaluation of the borrower. No material losses are anticipated as a result of these credit commitments. We maintain a separate reserve for unfunded commitments, which is included in other liabilities on the Consolidated Statements of Condition. The related provision for the reserve for unfunded commitments is included as part of the provision for credit losses on the Consolidated Statements of Comprehensive Income, along with the provision for loan losses.

The Association has entered into Lease Partner Interim Funding Agreements (IFA) with Farm Credit Leasing Services Corporation (FCL). These interim funded transactions are those in which the related leased equipment must be built or constructed over a period of time and in which invoices are paid by FCL in advance of lease commencement. Under the IFA, the Association has agreed to Participate in the related lease once it commences resulting in off-balance-sheet risk. At December 31, 2018, \$3.2 million of commitments under IFA's were outstanding.

High Risk Assets

Non-performing loan volume is comprised of nonaccrual loans, restructured loans, and loans 90 days past due still accruing interest, and are referred to as impaired loans. High risk assets consist of impaired loans and other property owned. Prudent credit administration coupled with customer commitment to timely loan payments has resulted in a low level of high risk assets including nonaccrual loans.

Comparative information regarding high risk assets in the portfolio, including any interest on accruing loans, is provided in the following table as of December 31 (\$ thousands).

	2018	2017	2016
Nonaccrual loans and leases:			
Real estate mortgage loans	\$ 13,947	\$ 5,631	\$ 4,099
Production and intermediate-term loans	13,148	3,912	1,439
Total nonaccrual loans	\$ 27,095	\$ 9,543	\$ 5,538
Total accruing loans 90 days past due	-	-	-
Restructured loans	-	-	-
Other property owned	-	-	-
Total high risk assets	\$ 27,095	\$ 9,543	\$ 5,538
Nonaccrual loans to total loans	.90%	.35%	.22%
High risk assets to total loans	.90%	.35%	.22%
High risk assets to shareholders' equity	5.17%	2.01%	1.28%

Nonaccrual loans represent all loans where there is a reasonable doubt as to collection of all principal and/or interest. Of the 51 loans in the nonaccrual portfolio, 42 loans remain well secured and are considered fully collectible. Nine nonaccrual loans have additional weaknesses in existing facts that make collection in full questionable. Five nonaccrual loans were past due 90 days or more at December 31, 2018. Nonaccrual loans increased \$17.6 million at December 31, 2018 compared with the year-end 2017 due to the transfers of additional loans to nonaccrual partially offset by pay-offs. Four customers comprise approximately 75% of the total nonaccrual volume.

The following table provides additional information on nonaccrual loans at December 31 (\$ thousands).

	2018	2017	2016
Nonaccrual loans current as to principal and interest	\$ 25,566	\$ 8,124	\$ 3,121

For the years presented, we had no loans restructured or cash basis nonaccrual loans or leases. Other property owned is real or personal property that has been acquired through foreclosure, deed in lieu of foreclosure or other means. We had no other property owned for any of the periods presented.

High risk asset volume is anticipated to increase slightly due to continued stress in the dairy industry resulting from continued low net milk prices. We expect income in dairy to be at or below breakeven and profitability in our other primary commodities.

Credit Quality

We review the credit quality of the loan portfolio on an on-going basis as part of our risk management practices. Each loan is classified according to the Uniform Classification System (UCS), which is used by all System institutions. Below are the classification definitions.

- Acceptable – assets are expected to be fully collectible and represent the highest quality;
- Other Assets Especially Mentioned (OAEM) – assets are currently collectible but exhibit some potential weakness;
- Substandard – assets exhibit some serious weakness in repayment capacity, equity, and/or collateral pledged on the loan;
- Doubtful – assets exhibit similar weaknesses as substandard assets. However, doubtful assets have additional weaknesses in existing facts, conditions and values that make collection in full highly questionable; and
- Loss – assets are not considered collectible.

The following table shows credit quality of loans and leases including accrued interest classified under the UCS as a percentage of total loans including accrued interest as of the end of the last three fiscal years.

	2018	2017	2016
Acceptable	93.9%	93.7%	96.0%
OAEM	2.7	2.3	2.4
Substandard	3.4	4.0	1.6
Doubtful	0.0	0.0	-
Total	100.0%	100.0%	100.0%

During 2018, recent economic conditions have created challenges for some borrowers as reflected in the increase in nonaccrual loan volume. Despite the economic conditions, our credit quality has increased slightly from year-end 2017. Loans classified as “Acceptable” or “OAEM” were 96.6% at December 31, 2018, 96.0% at December 31, 2017, and 98.4% at December 31, 2016. We had three loans classified as doubtful at December 31, 2018, two at December 31, 2017, and none at December 31, 2016. The financial position of most agricultural producers strengthened during the past decade, and most of our borrowers have maintained generally strong financial positions. As such, our credit quality is anticipated to remain sound in the near term. However, agriculture remains a cyclical business that is heavily influenced by production, operating costs and commodity prices. Each of these can be significantly impacted by uncontrollable events. If less favorable economic conditions continue, it will likely lead to weakening in the loan portfolio. Loan delinquencies (accruing loans 30 days or more past due) as a percentage of accruing loans increased but remained at a low level of 0.34% at December 31, 2018, compared with 0.23% at December 31, 2017 and 0.17% at December 31, 2016.

Allowance for Credit Losses

We maintain an allowance for credit losses at a level consistent with the probable losses identified by management. The allowance for credit losses at each period end was considered to be adequate to absorb probable losses existing in the loan portfolio as well as potential losses from unfunded commitments. Because the allowance for credit losses considers factors such as current agricultural and economic conditions, loan loss experience, portfolio quality and loan portfolio composition, there will be a direct impact to the allowance for credit losses and our Consolidated Statements of Comprehensive Income when there is a change in any of those factors.

The provision for loan losses and the reserve for unfunded commitments are included together as part of the provision for credit losses on the Consolidated Statements of Comprehensive Income. The allowance for loan losses is presented as an adjustment to the value of our loan portfolio for inherent credit losses related to the portfolio risk. The reserve for unfunded commitments takes into consideration potential losses related to unfunded commitments. The reserve is reported with other liabilities on the Association's Consolidated Statements of Condition. The reserve for unfunded commitments was \$1,004 thousand as of December 31, 2018, \$889 thousand as of December 31, 2017 and \$1,057 thousand as of December 31, 2016.

The following table provides relevant information regarding the allowance for loan losses as of the end of the last three fiscal years (\$ thousands).

	2018	2017	2016
Balance at beginning of year	\$ 6,368	\$ 6,584	\$ 5,034
Charge-offs – production and intermediate-term	-	(9)	-
Recoveries – production and intermediate-term	-	1	-
Transfers (to) from reserve for unfunded commitments	(115)	168	(632)
Provision for loan losses/(loan loss reversals)	1,320	(376)	2,182
Balance at December 31	\$ 7,573	\$ 6,368	\$ 6,584

The following table provides the allowance for loan losses by loan type as of the end of the last three fiscal years (\$ thousands).

	2018	2017	2016
Real estate mortgage	\$ 3,693	\$ 3,459	\$ 3,649
Production and intermediate-term	3,439	2,484	2,714
Agribusiness	439	422	218
Rural residential real estate	2	3	3
Total	\$ 7,573	\$ 6,368	\$ 6,584

The allowance for loan losses increased \$1.2 million from December 31, 2017 to \$7.6 million at December 31, 2018. The increase in allowance for loan losses was primarily due to the provision for loan losses of \$1.3 million that was recorded due to increased risk in the loan portfolio partially offset by the transfers to the reserve for unfunded commitments of \$115 thousand. Transfers between the allowance for loan losses and the reserve for unfunded commitments can occur in conjunction with funding a seasonal line of credit or other loan and decreasing a related unfunded commitment or, conversely, receiving a loan payment and increasing a related unfunded commitment. Newly-executed loan commitments will also increase this liability. There were no charge-offs or recoveries recorded during 2018. During 2017, our allowance for loan losses decreased \$0.2 million primarily due to the loan loss reversal of \$376 thousand that was recorded due to decreases in the default probabilities in the combined System risk rating guidance partially offset by the transfers from the reserve for unfunded commitments of \$168 thousand as explained above. Comparative allowance for credit losses coverage as a percentage of loans and certain other credit quality indicators as of December 31 are presented in the following table.

	2018	2017	2016
Allowance for credit losses as a percentage of:			
Loans	.29%	.27%	.30%
Impaired loans	31.66%	76.03%	137.96%
Nonaccrual loans	31.66%	76.03%	137.96%

For additional information, refer to Note 4, “Loans and Allowance for Credit Losses,” of the accompanying consolidated financial statements.

Young, Beginning and Small Farmers and Ranchers Program

As part of the Farm Credit System, we are committed to providing sound and dependable credit and related services to young, beginning and small (YBS) farmers and ranchers. Our YBS mission statement is “To serve Young, Beginning, and Small farmers and ranchers in order to facilitate their entrance into agriculture and improve the income and well-being of both existing and prospective members by making available an adequate and dependable supply of credit along with providing closely related services necessary for their success.” YBS farmers and ranchers are:

- Young Farmer: A farmer or rancher who is age 35 or younger as of the date the loan is originally made.
- Beginning Farmer: A farmer or rancher who has ten years or less farming or ranching experience as of the date the loan is originally made.
- Small Farmer: A farmer or rancher who normally generates less than \$250 thousand in annual gross sales of agricultural or aquatic products at the date the loan is originally made.

The following table outlines our percentage of YBS loans as a percentage of the number of loans in our loan portfolio while the USDA column represents the percent of farmers and ranchers classified as YBS within our territory per the 2012 USDA Agricultural Census, which is the most current data available. Due to FCA regulatory definitions, a farmer/rancher may be included in multiple categories as they would be included in each category in which the definition was met.

	2018	2017	2016	USDA
Young	14.7%	15.1%	15.2%	11.1%
Beginning	21.0%	21.6%	22.2%	20.7%
Small	18.3%	19.6%	20.8%	76.2%

Note that several differences exist in definitions between USDA statistics and our data due to our use of FCA definitions. Young farmers are defined as 34 years old and younger by the USDA, while FCA definitions include farmers 35 years old and younger. Beginning farmers are defined by FCA as those with 10 years or less farming experience; however, the USDA identifies beginning farmers as on their current farm less than 10 years. This may include both beginning farmers and experienced farmers who have recently changed farmsteads. Our percentages are based on the number of loans in our portfolio, while the USDA percentages are based on the number of farmers and ranchers. While these definition differences do exist, the information is the best comparative information available.

We establish annual quantitative targets to measure our mission to serve YBS farmers and ranchers in our territory. The targets are quantified by the number of new YBS loans as a percentage of total new loans. The targets for 2019 through 2021 are as follows:

	2019 Number of New Loans	2020 Number of New Loans	2021 Number of New Loans
Young	16%	16%	16%
Beginning	24%	24%	24%
Small			
\$0-\$50,000	35%	35%	35%
\$50,001-\$100,000	55%	55%	55%
\$100,001-\$250,000	42%	42%	42%
>\$250,001	13%	13%	13%

Annual marketing goals established to increase market share of loans to YBS farmers and ranchers are as follows:

- Offer related services directly, or in coordination, with other organizations that are responsive to the needs of YBS farmers and ranchers in our territory;
- Take full advantage of opportunities to coordinate credit and services offered by other system institutions, governmental and private sources, to those who qualify as YBS farmers and ranchers in our territory; and,
- Implement effective outreach programs to attract YBS farmers and ranchers.

The Association financially supports and is involved in outreach activities within our lending territory in a continuing effort to achieve qualitative goals. Our staff actively participates in the Los Banos, Merced and Stanislaus county fairs. We support and promote the Merced and Stanislaus FFA project competition as well as other community educational training activities. Yosemite Farm Credit coordinates and donates to a territory wide scholarship program for students graduating from high school who plan to continue their education in the agricultural field.

To ensure that credit and services offered to our YBS farmers and ranchers are provided in a safe, sound manner, and within our risk-bearing capacity, we utilize customized underwriting standards, loan guarantee programs, and coordinated lending. YBS loans that do not meet the traditional underwriting standard require Loan Committee approval.

Management provides quarterly reports to our Board of Directors detailing the number, volume and credit quality of our YBS customers.

CREDIT RISK MANAGEMENT

Credit risk arises from the potential failure of a borrower to meet repayment obligations that result in a financial loss to the lender. Credit risk exists in our loan portfolio, in our unfunded loan commitments, and also in our standby letters of credit. Credit risk is actively managed on an individual and portfolio basis through application of sound lending and underwriting standards, policies and procedures.

Underwriting standards are utilized to determine an applicant's operational, financial, and managerial resources available for repaying debt within the term of the note and loan agreement. Underwriting standards include among other things, an evaluation of:

- character – borrower integrity and credit history;
- capacity – repayment capacity of the borrower based on cash flows from operations or other sources of income;
- collateral – to protect the lender in the event of default and also serve as a secondary source of loan repayment;
- capital – ability of the operation to survive unanticipated risks; and
- conditions – intended use of the loan funds, terms, restrictions, etc.

Processes for information gathering, balance sheet and income statement verification, loan analysis, credit approvals, disbursements of proceeds and subsequent loan servicing actions are established and followed.

By regulation, we cannot have loan commitments to one borrower for more than 15% of our regulatory capital. Additionally, we set our own lending limits to manage loan concentration risk. We have adopted an individual lending limit maximum of 10% of permanent capital.

We have established internal lending delegations to properly control the loan approval process. Delegations to staff are based on our risk-bearing ability, loan size, complexity, type and risk, as well as the expertise and position of the credit staff member. Larger and more complex loans or loans perceived to have higher risk are typically approved by our loan committee with the most experienced and knowledgeable credit staff serving as members.

The majority of our lending is mortgage real estate loans which must be secured by a first lien on real estate. Production and intermediate-term lending accounts for most of the remaining volume and is typically secured by livestock, crops and equipment. Collateral evaluations are completed in compliance with FCA and Uniform Standards of Professional Appraisal Practices requirements. All property is appraised at market value. All collateral evaluations must be performed by a qualified appraiser. Certain appraisals must be performed by individuals with a state certification or license.

We use a two-dimensional risk rating model (Model) based on the Farm Credit System's Combined System Risk Rating Guidance. The Model estimates each loan's probability of default (PD) and loss given default (LGD). PD estimates the probability that a borrower will experience a default within twelve months from the date of determination. LGD provides an estimation of the anticipated loss with respect to a specific financial obligation of a borrower assuming a default has occurred or will occur within the next twelve months. The Model uses objective and subjective criteria to identify inherent strengths, weaknesses, and risks in each loan. PDs and LGDs are utilized in loan and portfolio management processes and are utilized for the allowance for credit losses estimate. This Model also serves as the basis for economic capital modeling.

The Model's 14-point probability of default scale provides for nine acceptable categories, one OAEM category, two substandard categories, one doubtful category and one loss category; each carrying a distinct percentage of default probability. The Model's LGD scale provides six categories, A through F, that have the following anticipated principal loss and range of economic loss expectations:

- A. 0% anticipated principal loss; 0% to 5% range of economic loss
- B. 0% to 3% anticipated principal loss; ≥5% to 15% range of economic loss
- C. >3% to 7% anticipated principal loss; ≥15% to 20% range of economic loss
- D. >7% to 15% anticipated principal loss; ≥20% to 25% range of economic loss
- E. >15% to 40% anticipated principal loss; ≥25% to 50% range of economic loss
- F. above 40% anticipated loss; above 50% range of economic loss

RESULTS OF OPERATIONS

Earnings Summary

In 2018, we recorded net income of \$65.1 million, compared with \$53.0 million in 2017 and \$43.4 million in 2016. The increase in net income in 2018 and 2017 were primarily due to increased net interest income and non-interest income from non-recurring items.

The following table presents the changes in the significant components of net income from the previous year (\$ thousands).

	2018 vs. 2017	2017 vs. 2016
Net income, prior year	\$ 52,998	\$ 43,385
Increase (decrease) from changes in:		
Interest income	28,092	19,970
Interest expense	(18,881)	(12,506)
Increase in net interest income	9,211	7,464
(Provision for credit losses)/credit loss reversals	(1,696)	2,558
Non-interest income	4,990	1,456
Non-interest expense, including tax expense	(449)	(1,865)
Total increase in net income	12,056	9,613
Net income, current year	\$ 65,054	\$ 52,998

Return on average assets increased to 2.20% from 1.99% in 2017, and return on average shareholders' equity increased to 12.85% from 11.55% in 2017. The increases were primarily a result of increased net interest income.

Net Interest Income

Net interest income for 2018 was \$78.0 million compared with \$68.8 million for 2017 and \$61.3 million for 2016. Net interest income is our principal source of earnings and is impacted by interest earning asset volume, yields on assets and cost of debt. The change in net interest income was largely due to loan growth.

The table below provides an analysis of the individual components of the change in net interest income during 2018 and 2017 (\$ thousands).

	2018 vs. 2017	2017 vs. 2016
Net interest income, prior year	\$ 68,808	\$ 61,344
Increase (decrease) from changes in:		
Interest rates earned	16,395	11,308
Average interest-earning assets	11,824	8,468
Loans in nonaccrual status	(127)	194
Increase in interest income	28,092	19,970
Interest rates paid	(14,360)	(9,753)
Average interest-bearing liabilities	(4,521)	(2,753)
Increase in interest expense	(18,881)	(12,506)
Increase in net interest income	9,211	7,464
Net interest income, current year	\$ 78,019	\$ 68,808

The following table illustrates net interest margin and the average interest rates on loans and debt cost, as well as interest rate spread.

	For the Year Ended December 31		
	2018	2017	2016
Net interest margin	2.78%	2.72%	2.66%
Interest rate on:			
Average loan volume	4.86%	4.29%	3.83%
Average debt	2.39%	1.81%	1.36%
Interest rate spread	2.47%	2.48%	2.47%

The increase in net interest margin was due to higher earnings on owned funds.

Provision for Credit Losses/(Credit Loss Reversals)

We monitor our loan portfolio on a regular basis to determine if any increase through provision for credit losses or decrease through a credit loss reversal in our allowance for credit losses is warranted based on our assessment of the probable losses in our loan portfolio and potential losses from unfunded commitments. We recorded a net provision for credit losses of \$1.3 million for the year ended December 31, 2018 compared with net credit loss reversal of \$0.4 million for the year ended December 31, 2017 and net provision for credit losses of \$2.2 million for the year ended December 31, 2016. The increase in provision for credit losses during 2018 was primarily due to loan growth as well as increased risk exposure for the dairy segment of the loan portfolio. The decrease in provision for credit losses during 2017 was primarily due to decreases in the default probabilities in the combined System risk rating guidance. The increase in provision for credit losses during 2016 was due to loan growth as well as large loan risk management. Based upon the year-end 2018 analysis, management believes the allowance for

credit losses is adequate to provide for the current risk inherent in the Association's loan portfolio and potential losses from unfunded commitments. A specific reserve was recorded on nine loans at December 31, 2018.

Non-Interest Income

During 2018, we recorded non-interest income of \$16.8 million, compared with \$11.8 million in 2017 and \$10.3 million in 2016. Patronage distributions from CoBank are our primary source of non-interest income. Patronage is accrued in the year earned and then received from CoBank in the following year. CoBank patronage is distributed in cash and stock. Patronage earned from CoBank was \$13.7 million in 2018, \$10.6 million in 2017, and \$9.4 million in 2016. During the year ended December 31, 2018, CoBank declared a special one-time patronage distribution to share the benefits of federal tax reform legislation and earnings from significant non-recurring items in 2018 with member-borrowers. The Association's portion of the distribution was \$1.6 million, which was paid by CoBank in September 2018.

In August 2017, CoBank management announced changes to their capital plans and patronage programs for eligible customer-owners designed to address a number of marketplace challenges. The changes are intended to strengthen CoBank's long-term capacity to serve customers' borrowing needs, enhance CoBank's ability to capitalize future customer growth, and ensure equitability among different customer segments. Pursuant to the changes approved by CoBank's Board of Directors, CoBank created two separate capital plans for cooperative and other eligible direct borrowers under which targeted patronage levels and cash/equity splits will be more equitably balanced between the earnings generated by different customer portfolios and the use of CoBank by its patronage eligible members. The new target patronage levels took effect in 2018 calendar year and will be reflected in patronage distributions made in March 2019. The Association institutions will transition to their new targeted patronage levels over a multiyear period ending in 2020. No changes are being made to target equity requirements or the loan base periods.

The Association received a refund of Farm Credit Insurance Fund premiums in the amount of \$1.7 million in March 2018, which is included in other non-interest income on the Consolidated Statements of Comprehensive Income.

Non-interest Expense

For the year ended December 31, 2018, total non-interest expenses increased \$0.4 million, or 1.6%, compared with the year ended December 31, 2017. Non-interest expense includes salaries & benefits, occupancy and equipment, insurance fund premiums and other operating expenses. Salaries and benefits increased \$1.1 million, or 5.9% due to annual increases and the addition of several new employees. These additions are in response to Association growth and planning for succession of retiring employees. Insurance fund premium decreased \$1.0 million or 32.7% due to a decrease in the average premium rate. Other non-interest expense consists of accounts which are each less than 5% of total non-interest expense.

LIQUIDITY

Liquidity is necessary to meet our financial obligations. Liquidity is needed to pay our note with CoBank, fund loans and other commitments, and fund business operations in a cost-effective manner. Our liquidity policy is intended to maximize debt reduction, liquidate non-earning assets, and manage short-term cash flow. Our direct loan with CoBank, cash on hand and borrower loan repayments provide adequate liquidity to fund our on-going operations and other commitments.

Funding Sources

Our primary source of liquidity is the ability to obtain funds for our operations through a borrowing relationship with CoBank. Our note payable to CoBank is collateralized by a pledge to CoBank of substantially all of our assets. Substantially all cash received is applied to the note payable and all cash disbursements are drawn on the note payable. The indebtedness is governed by a General Financing Agreement (GFA) with CoBank which matures on December 31, 2022. We expect renewal of the GFA at that time. The annual average principal balance of the note payable to CoBank was \$2.399 billion in 2018, \$2.150 billion in 2017 and \$1.940 billion in 2016.

We plan to continue to fund lending operations through the utilization of our funding agreement with CoBank, retained earnings from current and prior years and from borrower stock investments. CoBank's primary source of funds is the ability to issue System-wide Debt Securities to investors through the Federal Farm Credit Bank Funding Corporation. This access has traditionally provided a dependable source of competitively priced debt that is critical for supporting our mission of providing credit to agriculture and rural America. We have been able to obtain sufficient funding to meet the needs of our customers.

Interest Rate Risk

The interest rate risk inherent in our loan portfolio is substantially mitigated through our funding relationship with CoBank which allows for loans to be match-funded. Borrowings from CoBank match the pricing, maturity, and option characteristics of our loans to borrowers. CoBank manages interest rate risk through the direct loan pricing and its asset/liability management processes. Although CoBank incurs and manages the primary sources of interest rate risk, we may still be exposed to interest rate risk through the impact of interest rate changes on earnings generated from our loanable funds.

Funds Management

We offer variable, fixed, adjustable prime-based and LIBOR-based rate loans to borrowers. Our Asset Liability Committee establishes interest rates based on the following factors: 1) the interest rate charged by CoBank; 2) our existing rates and spreads; 3) the competitive rate environment; and 4) our profitability objectives.

CAPITAL RESOURCES

Capital supports asset growth and provides protection for unexpected credit and operating losses. Capital is also needed for future growth and for investments in new products and services. We believe a sound capital position is critical to our long-term financial success due to the volatility and cycles in agriculture. Over the past several years, we have been able to build capital primarily through net income retained after patronage. Shareholders' equity at December 31, 2018 totaled \$524.0 million, compared with \$473.7 million at December 31, 2017 and \$433.3 million at December 31, 2016. The increase of \$50.3 million in shareholders' equity reflects net income, net stock retirements and a decrease in comprehensive loss, offset by patronage refunds. Refer to Note 8, to the consolidated financial statements, "Shareholders' Equity" for additional information related to our capital and related requirements and restrictions.

Our capital position is reflected in the following ratio comparisons at December 31.

	2018	2017	2016
Debt to shareholders' equity	5.08:1	5.10:1	5.14:1
Shareholders' equity as a percent of net loans	17.48%	17.45%	17.29%
Shareholders' equity as a percent of total assets	16.45%	16.39%	16.28%

Debt to shareholders' equity decreased and shareholders' equity as a percent of net loans increased from 2017 primarily due to an increase in retained earnings of \$50.3 million and a \$285.6 million increase in loans outstanding from 2017.

Retained Earnings

Our retained earnings increased \$50.3 million to \$522.2 million at December 31, 2018 from \$471.9 million at December 31, 2017 and increased \$40.4 from \$431.5 million at December 31, 2016. The 2018 increase was a result of net income of \$65.1 million partially offset by \$14.7 million of patronage distributions declared.

Patronage Program

We have a Patronage Program that allows us to distribute our available net earnings to our shareholders. This program provides for the application of net earnings in the manner described in our Bylaws. In addition to determining the amount and method of patronage to be distributed, the Bylaws require increasing surplus to meet capital adequacy standards established by Regulations; increasing surplus to a level necessary to support competitive pricing at targeted earnings levels; and increasing surplus for reasonable reserves. Patronage distributions are based on business done with us during the year. We paid cash patronage of \$12.7 million in 2018, compared to \$11.5 million in 2017, and \$10.4 million in 2016. During 2018, we declared patronage distributions of \$14.7 million to be paid in 2019. In February 2019, an additional patronage distribution in the amount of \$7.2 million was declared, to be paid in 2019. Refer to Note 17, to the consolidated financial statements, "Subsequent Events" for additional information.

Stock

Our total stock and participation certificates decreased \$2 thousand to \$1.9 million at December 31, 2018, and at December 31, 2017, and \$1.8 million at December 31, 2016. In accordance with the Association's capitalization bylaws, the Association has a borrower purchased capital requirement of \$1,000 per customer.

Accumulated Other Comprehensive Income and Losses

Accumulated other comprehensive loss totaled \$6 thousand at December 31, 2018, as compared to \$48 thousand at year-end 2017 and \$91 thousand at year-end 2016. Certain employees participate in a non-qualified Defined Benefit Pension Restoration Plan (Plan). Accounting guidance requires recognition of the Plan's underfunded status and unamortized actuarial gains and losses and prior service costs or credits as a liability with an offsetting adjustment to accumulated other comprehensive loss.

Capital Plan and Regulatory Requirements

Our Board of Directors establishes a formal capital adequacy plan that addresses capital goals in relation to risks. The capital adequacy plan assesses the capital level necessary for financial viability and to provide for growth. Our plan is updated annually and approved by our Board of Directors. FCA regulations require the plan to consider the following factors in determining optimal capital levels, including:

- Regulatory capital requirements;
- Asset quality;
- Needs of our customer base; and
- Other risk-oriented activities, such as funding and interest rate risks, contingent and off-balance sheet liabilities and other conditions warranting additional capital.

In 2016, the FCA adopted final rules (the New Capital Regulations) relating to regulatory capital requirements for System banks and Associations. The New Capital Regulations took effect January 1, 2017. The stated objectives of the New Capital Regulations are as follows:

- To modernize capital requirements while ensuring that System institutions continue to hold sufficient regulatory capital to fulfill the System's mission as a government-sponsored enterprise;
- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System;
- To make System regulatory capital requirements more transparent; and
- To meet certain requirements of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act).

The New Capital Regulations, among other things, replaced existing core surplus and total surplus requirements with common equity tier 1 (CET1), tier 1 and total capital (tier 1 plus tier 2) risk-based capital ratio requirements. The New Capital Regulations also added a tier 1 leverage ratio for all System institutions, which replaced the existing net collateral ratio for System banks. In addition, the New Capital Regulations established a capital conservation buffer and a leverage buffer and enhanced the sensitivity of risk weightings. The revisions to the risk-weightings included alternatives to the use of credit ratings, as required by the Dodd-Frank Act.

The New Capital Regulations set the following minimum risk-based requirements:

- A CET1 capital ratio of 4.5 percent;
- A tier 1 capital ratio (CET1 capital plus additional tier 1 capital) of 6 percent; and
- A total capital ratio (tier 1 capital plus tier 2) of 8 percent.

The New Capital Regulations also set a minimum tier 1 leverage ratio (tier 1 capital divided by total assets) of 4 percent, of which at least 1.5 percent must consist of unallocated retained earnings (URE) and URE equivalents, which are nonqualified allocated equities with certain characteristics of URE.

The New Capital Regulations established a capital cushion (capital conservation buffer) of 2.5 percent above the risk-based CET1, tier 1 and total capital requirements. In addition, the New Capital Regulations established a leverage capital cushion (leverage buffer) of 1 percent above the tier 1 leverage ratio requirement. If capital ratios fall below the regulatory minimum plus buffer amounts, capital distributions (equity redemptions, cash dividend payments, and cash patronage payments) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval. The New Capital Regulations established a three-year phase-in of the capital conservation buffer beginning January 1, 2017. There is no phase-in of the leverage buffer. The Permanent Capital Ratio requirements continues to remain in effect; however, the risk-adjusted assets are calculated differently than in the past.

As shown in the following table, at December 31, 2018, our capital and leverage ratios exceeded regulatory minimums. If these capital standards are not met, the FCA can impose restrictions, including limiting our ability to pay patronage distributions, retire equities and pay preferred stock dividends.

	2018	2017	Minimum Requirement with Buffer
Common Equity Tier 1 Capital Ratio	14.10%	14.26%	7.00%
Tier 1 Capital Ratio	14.10%	14.26%	8.50%
Total Capital Ratio	14.38%	14.55%	10.50%
Tier 1 Leverage Ratio	14.51%	14.52%	5.00%
Unallocated Retained Earnings and URE Equivalents (UREE) Leverage	16.82%	16.75%	1.50%
Permanent capital ratio	14.14%	14.30%	7.00%

The minimum ratios established were not meant to be adopted as the optimum capital level, so we have established goals in excess of the regulatory minimum. As of December 31, 2018, we have met our goals. Due to our strong capital position, we will continue to be able to retire at-risk stock.

The following table illustrates the capital ratios reported under prior FCA Regulations.

	2016	2015	2014
Permanent Capital Ratio	14.26%	14.72%	14.88%
Total Surplus Ratio	14.18%	14.64%	14.80%
Core Surplus Ratio	14.18%	14.64%	14.80%

Building Projects

Land in Oakdale was purchased for \$165 thousand in 2013 to build a new branch site, which will replace existing leased office space. Construction of the 6 thousand square foot branch office began in late 2018 and is expected to be completed in October 2019.

REGULATORY MATTERS

As of December 31, 2018, we had no enforcement actions in effect and FCA took no enforcement actions on us during the year.

GOVERNANCE

Board of Directors

We are governed by a ten-member board that provides direction and oversees our management. Of these directors, eight are elected by the shareholders and two are appointed by the elected directors. Our Board of Directors represents the interests of our shareholders. The Board of Directors meets regularly to perform the following functions, among others:

- selects, evaluates and compensates the chief executive officer;
- approves the strategic plan, capital plan, financial plan and the annual operating budget;
- oversees the lending operations;
- directs management on significant issues; and
- oversees the financial reporting process, communications with shareholders and our legal and regulatory compliance.

Director Independence

All directors must exercise sound judgment in deciding matters in the Association's interest. All Association directors are independent from the perspective that none of the management or staff serve as Board members. However, we are a financial services cooperative, and the Farm Credit Act and FCA Regulations require our elected directors to have a loan relationship with us.

The elected directors, as borrowers, have a vested interest in ensuring our Association remains strong and viable. The Board has established independence criteria to ensure that a loan relationship does not compromise the independence of our Board. Annually, in conjunction with our independence analysis and reporting on our loans to directors, each director provides financial information and any other documentation and/or assertions needed for the Board to determine the independence of each Board member.

Audit Committee

The Audit Committee reports to the Board of Directors. The Audit Committee is composed of five members. During 2018, ten meetings were held. The Audit Committee responsibilities generally include, but are not limited to:

- oversight of the financial reporting risk and the accuracy of the quarterly and annual shareholder reports;
- oversight of the system of internal controls related to the preparation of quarterly and annual shareholder reports;
- review and assessment of the impact of accounting and auditing developments on the consolidated financial statements;
- establishment and maintenance of procedures for the receipt, retention and treatment of confidential and anonymous submission of concerns regarding accounting, internal accounting controls or auditing matters; and
- oversight of the Association's internal audit program, the independence of the outside auditors, the adequacy of the Association's system of internal controls and procedures, and the adequacy of management's action with respect to recommendations arising from those auditing activities.

Compensation Committee

The Compensation Committee (Committee) is responsible for the oversight of employee and director compensation. The Committee is composed of the full Board of Directors. The Committee annually reviews, evaluates and approves the compensation policies, programs and plans for senior officers and employees including benefits programs.

Other Governance

The Board has monitored the requirements of public companies under the Sarbanes-Oxley Act. While we are not subject to the requirements of this law, we continually implement steps to strengthen governance and financial reporting. We strive to maintain strong governance and financial reporting through the following actions:

- a system for the receipt and treatment of whistleblower complaints;
- a code of ethics for the President/CEO, Chief Operating Officer, Chief Credit Officer, Chief Financial Officer, and other Association financial professionals as determined by the CEO;
- open lines of communication between the independent auditors, management, and the Audit Committee;
- “plain English” disclosures;
- officer certification of accuracy and completeness of the consolidated financial statements; and
- information disclosure through our website.

FORWARD-LOOKING INFORMATION

Our discussion contains forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Words such as “anticipates,” “believes,” “could,” “estimates,” “may,” “should,” and “will,” or other variations of these terms are intended to identify forward-looking statements. These statements are based on assumptions and analyses made in light of experience and other historical trends, current conditions, and expected future developments. However, actual results and developments may differ materially from our expectations and predictions due to a number of risks and uncertainties, many of which are beyond our control. These risks and uncertainties include, but are not limited to:

- political, legal, regulatory and economic conditions and developments in the United States and abroad;
- economic fluctuations in the agricultural, rural utility, international, and farm-related business sectors;
- weather, disease, and other adverse climatic or biological conditions that periodically occur that impact agricultural productivity and income;
- changes in United States government support of the agricultural industry and/or the Farm Credit System; and
- actions taken by the Federal Reserve System in implementing monetary policy.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our consolidated financial statements are based on accounting principles generally accepted in the United States of America. Our significant accounting policies are critical to the understanding of the Association results of operations and financial position because some accounting policies require us to make complex or subjective judgments and estimates that may affect the value of certain assets or liabilities. We consider these policies critical because we have to make judgments about matters that are inherently uncertain. For a complete discussion of significant accounting policies, see Note 2, “Summary of Significant Accounting Policies,” and Note 4, “Loans and Allowance for Credit Losses,” of the accompanying consolidated financial statements. The development and selection of critical accounting policies, and the related disclosures, have been reviewed by our Audit Committee. A summary of critical policies relating to determination of the allowance for credit losses follows.

Allowance for Credit Losses

The allowance for credit losses is a combination of our allowance for loan losses and the reserve for unfunded liabilities. It is our best estimate of the amount of probable loan losses existing in and inherent in our loan portfolio as well as potential losses from unfunded commitments as of the balance sheet date. The allowance for credit losses is increased through provisions for credit losses and loan recoveries and is decreased through credit loss reversals and loan charge-offs. We determine the allowance for credit losses based on a regular evaluation of the loan portfolio and unfunded commitments, which generally considers recent historical charge-off experience adjusted for relevant factors.

Loans and unfunded commitments are evaluated based on the borrower's overall financial condition, resources, and payment record, the prospects for support from any financially responsible guarantor and, if appropriate, the estimated net realizable value of any collateral. The allowance for credit losses attributable to these loans and unfunded commitments are established by a process that estimates the probable loss inherent in the loans and unfunded commitments, taking into account various historical and projected factors, internal risk ratings, regulatory oversight, and geographic, industry and other factors.

Changes in the factors we consider in the evaluation of losses in the loan portfolio and unfunded commitments could occur for various credit related reasons and could result in a change in the allowance for credit losses, which would have a direct impact on the provision for credit losses and results of operations. See Note 2, "Summary of Significant Accounting Policies," and Note 4, "Loans and Allowance for Credit Losses," of the accompanying consolidated financial statements for detailed information regarding the allowance for credit losses.

CUSTOMER PRIVACY

FCA regulations require that borrower information be held in confidence by Farm Credit institutions, their directors, officers and employees. FCA regulations and our Standards of Conduct Policies specifically restrict Farm Credit institution directors and employees from disclosing information not normally contained in published reports or press releases about the institution or its borrowers or members. These regulations also provide Farm Credit institutions clear guidelines for protecting their borrowers' nonpublic information.

Report of Independent Auditors

To the Board of Directors of Yosemite Farm Credit, ACA and Subsidiaries:

We have audited the accompanying consolidated financial statements of Yosemite Farm Credit, ACA and its subsidiaries (the "Association"), which comprise the consolidated statements of condition as of December 31, 2018, 2017 and 2016, and the related consolidated statements of comprehensive income, of changes in shareholders' equity, and of cash flows for the years then ended.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on the consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the Association's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Yosemite Farm Credit, ACA and its subsidiaries as of December 31, 2018, 2017 and 2016, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

YOSEMITE FARM CREDIT, ACA
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – ORGANIZATION AND OPERATIONS:

- A. **Organization:** Yosemite Farm Credit, ACA and its subsidiaries, Yosemite Land Bank, FLCA and Yosemite Production Credit, PCA, (collectively called the Association) are member-owned cooperatives which provide credit and credit-related services to or for the benefit of eligible borrowers/shareholders for qualified agricultural purposes in the counties of Stanislaus, Merced, Tuolumne, Mariposa and Fresno, in the state of California.

The Association is a lending institution of the Farm Credit System (System), a nationwide system of cooperatively owned banks and associations, which was established by Acts of Congress to meet the credit needs of American agriculture and is subject to the provisions of the Farm Credit Act of 1971, as amended (the Farm Credit Act). The System is comprised of three Farm Credit Banks, one Agricultural Credit Bank and 69 associations.

CoBank, ACB (funding bank or the “Bank”), its related associations and AgVantis, Inc. (AgVantis) are collectively referred to as the District. CoBank provides the funding to associations within the District and is responsible for supervising certain activities of the District Associations. AgVantis, which is owned by the entities it serves, provides technology and other operational services to certain associations. The CoBank District consists of CoBank, 22 Agricultural Credit Associations (ACA), which each have two wholly owned subsidiaries, (a FLCA and a PCA), and AgVantis.

ACA parent companies provide financing and related services through their FLCA and PCA subsidiaries. Generally, the FLCA makes secured long-term agricultural real estate and rural home mortgage loans and the PCA makes short and intermediate-term loans for agricultural production or operating purposes.

The Farm Credit Administration (FCA) is delegated authority by Congress to regulate the System Banks and Associations. The FCA examines the activities of System institutions to ensure their compliance with the Farm Credit Act, FCA regulations and safe and sound banking practices.

The Farm Credit Act established the Farm Credit System Insurance Corporation (Insurance Corporation) to administer the Farm Credit Insurance Fund (Insurance Fund). By law, the Insurance Fund is required to be used (1) to ensure the timely payment of principal and interest on System-wide debt obligations (Insured Debt), (2) to ensure the retirement of protected stock at par or stated value, and (3) for other specified purposes. The Insurance Fund is also available for discretionary use by the Insurance Corporation in providing assistance to certain troubled System institutions and to cover the operating expenses of the Insurance Corporation. Each System Bank is required to pay premiums, which may be passed on to the Associations, into the Insurance Fund based on its annual average outstanding insured debt adjusted to reflect the reduced risk on loans or investments guaranteed by federal or state governments until the assets in the Insurance Fund reach the “secure base amount,” which is defined in the Farm Credit Act as 2.0% of the aggregate Insured Debt or such other percentage of the Insured Debt as the Insurance Corporation, in its sole discretion, determines to be actuarially sound. When the amount in the Insurance Fund exceeds the secure base amount, the Insurance Corporation is required to reduce premiums, as necessary to maintain the Insurance Fund at the 2.0% level. As required by the Farm Credit Act, as amended, the Insurance Corporation may return excess funds above the secure base amount to System institutions. The Bank passes this premium expense and the return of excess funds as applicable

through to each Association based on the Association's average adjusted note payable with the Bank.

- B. Operations:** The Farm Credit Act sets forth the types of authorized lending activity, persons eligible to borrow, and financial services which can be provided by the Association. The Association is authorized to provide, either directly or in participation with other lenders, credit, credit commitments and related services to eligible borrowers. Eligible borrowers include farmers, ranchers, producers or harvesters of aquatic products, their cooperatives, rural residents and farm-related businesses. The Association also serves as an intermediary in offering credit life insurance and multi-peril crop insurance and provides other related services such as advance conditional payment accounts and lease financing.

The Association's financial condition may be impacted by factors affecting CoBank. The CoBank Annual Report is available free of charge on CoBank's website, www.cobank.com, or may be obtained at no charge by contacting Yosemite Farm Credit, 806 W. Monte Vista Ave., Turlock CA 95382 or calling (209) 667-2366. Upon request, Association shareholders will be provided with a copy of the CoBank Annual Report. The CoBank Annual Report discusses the material aspects of the Bank's and the District's financial condition, changes in financial condition, and results of operations.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

The accounting and reporting policies of the Association conform to accounting principles generally accepted in the United States of America (GAAP) and prevailing practices within the banking industry. The preparation of financial statements in conformity with GAAP requires Association management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, the valuation of deferred tax assets, and the determination of fair value of financial instruments and subsequent impairment analysis. Actual results may differ from these estimates. Significant estimates are discussed in these footnotes as applicable.

The consolidated financial statements include the accounts of Yosemite Land Bank, FLCA and Yosemite Production Credit, PCA. All significant inter-company transactions have been eliminated in consolidation.

Recently issued accounting pronouncements follow.

In August 2018, the FASB issued guidance entitled "Disclosure Framework — Changes to the Disclosure Requirements for Defined Benefit Plans." The guidance modifies the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. This guidance becomes effective for fiscal years ending after December 15, 2020. Early adoption is permitted. The guidance is to be applied on a retrospective basis for all periods. The adoption of this guidance will not impact the Association's financial condition or its results of operations, but will impact the employee benefit plan disclosures.

In August 2018, the FASB issued guidance entitled "Disclosure Framework — Changes to the Disclosure Requirements for Fair Value Measurement." The guidance modifies the requirements on fair value measurements by removing, modifying or adding to the disclosures. This guidance becomes effective for interim and annual periods beginning after December 15, 2019. Early adoption is permitted and an entity is permitted to early adopt any removal or modified disclosures and delay adoption of the additional disclosures until their effective date. The Association early adopted the removal and modified disclosures

during the fourth quarter of 2018. The adoption of this guidance did not impact the Association's financial condition or its results of operations.

In March 2017, the FASB issued guidance entitled "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Cost." The guidance requires that an employer report the service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. Other components are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations, if one is presented. This guidance became effective for interim and annual periods beginning after December 15, 2017. The adoption of this guidance did not materially impact the Association's financial condition, results of operations, or employee benefit plan disclosures.

In August 2016, the FASB issued guidance entitled "Classification of Certain Cash Receipts and Cash Payments." The guidance addresses specific cash flow issues with the objective of reducing the diversity in the classification of these cash flows. Included in the cash flow issues are debt prepayment or debt extinguishment costs and settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing. This guidance became effective for interim and annual periods beginning after December 15, 2017. The adoption of this guidance did not materially impact the Association's financial condition, results of operations, or its cash flows.

In June 2016, the FASB issued guidance entitled "Measurement of Credit Losses on Financial Instruments." The guidance replaces the current incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. Credit losses relating to available-for-sale securities would also be recorded through an allowance for credit losses. For public business entities that are not U.S. Securities and Exchange Commission filers, this guidance becomes effective for interim and annual periods beginning after December 15, 2020, with early application permitted. The Association is evaluating the impact of adoption on its financial condition and its results of operations.

In February 2016, the FASB issued guidance entitled "Leases." The guidance requires the recognition by lessees of lease assets and lease liabilities on the balance sheet for the rights and obligations created by those leases. Leases with lease terms of more than 12 months are impacted by this guidance. In July 2018, the FASB issued an update entitled "Leases – Targeted Improvements," which provides entities with an additional (and optional) transition method to adopt the new leases standard. Under this new transition method, an entity initially applies the new leases standard at the adoption date and recognizes a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. An entity that elects this additional transition method must provide the required disclosures of the now current standard for all prior periods presented. The guidance and related amendments in this update became effective for interim and annual periods beginning after December 15, 2018, with early application permitted. The adoption of this guidance did not materially impact the Association's financial condition or its results of operations.

In January 2016, the FASB issued guidance entitled "Recognition and Measurement of Financial Assets and Liabilities." The guidance affects, among other things, the presentation and disclosure requirements for financial instruments. For public entities, the guidance eliminates the requirement to disclose the methods and significant assumptions used to estimate the fair value of financial instruments carried at amortized cost. This guidance became effective for interim and annual periods beginning after December 15, 2017. The adoption of this guidance did not impact the Association's financial condition, results of operations, or fair value disclosures.

In May 2014, the FASB issued guidance entitled, “Revenue from Contracts with Customers.” The guidance governs revenue recognition from contracts with customers and requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Financial instruments and other contractual rights within the scope of other guidance issued by the FASB are excluded from the scope of this new revenue recognition guidance. The guidance sets forth the requirement for new and enhanced disclosures. The Association adopted the new standard effective January 1, 2018, using the modified retrospective approach. As the majority of the Association’s revenues are not subject to the new guidance, the adoption of the guidance did not have a material impact on the financial position, results of operations, equity or cash flows.

Following is a summary of significant accounting policies.

- A. Loans and Allowance for Credit Losses:** Long-term real estate mortgage loans generally have original maturities ranging from five to 40 years. Substantially all short and intermediate-term loans made for agricultural production or operating purposes have maturities of ten years or less. Loans are carried at their principal amount outstanding adjusted for charge-offs and deferred loan fees or costs. Interest on loans is accrued and credited to interest income based upon the daily principal amount outstanding. Loan origination fees and direct loan origination costs are capitalized and the net fee or cost is amortized over the life of the related loan as an adjustment to the yield.

Impaired loans are loans for which it is probable that principal and interest will not be collected according to the contractual terms of the loan and are generally considered substandard or doubtful, which is in accordance with the loan rating model, as described below. Impaired loans include nonaccrual loans, restructured loans and loans past due 90 days or more and still accruing interest. A loan is considered contractually past due when any principal repayment or interest payment required by the loan contract is not received on or before the due date. A loan shall remain contractually past due until it is formally restructured or until the entire amount past due, including principal, accrued interest, and penalty interest incurred is collected in full or otherwise discharged.

Impaired loans are generally placed in nonaccrual status when principal or interest is delinquent for 90 days or more (unless adequately collateralized and in the process of collection) or when circumstances indicate that collection of principal and/or interest is in doubt. Additionally, all loans over 180 days past due are placed in nonaccrual status. When a loan is placed in nonaccrual status, accrued interest deemed uncollectible is reversed (if accrued in the current year) and/or included in the recorded nonaccrual balance (if accrued in prior years). Loans are charged-off at the time they are determined to be uncollectible.

A restructured loan constitutes a troubled debt restructuring if for economic or legal reasons related to the debtor’s financial difficulties the Association grants a concession to the debtor that it would not otherwise consider.

When loans are in nonaccrual status, loan payments are generally applied against the recorded nonaccrual balance. A nonaccrual loan may, at times, be maintained on a cash basis. As a cash basis nonaccrual loan, the recognition of interest income from cash payments received is allowed when the collectability of the recorded investment in the loan is no longer in doubt and the loan does not have a remaining unrecovered charge-off associated with it. Nonaccrual loans may be returned to accrual status when all contractual principal and interest is current, the borrower has demonstrated payment performance, there are no unrecovered prior charge-offs and collection of future payments is no longer in doubt. If previously unrecognized interest income exists at the time

the loan is transferred to accrual status, cash received at the time of or subsequent to the transfer is first recorded as interest income until such time as the recorded balance equals the contractual indebtedness of the borrower.

The Association purchases loan and lease participations from other System and non-System entities to generate additional earnings and diversify risk related to existing commodities financed and the geographic area served. Additionally, the Association sells a portion of certain large loans to other System and non-System entities to reduce risk and comply with established lending limits. When loans are sold the sale terms comply with requirements under ASC 860 “Transfers and Servicing”.

The Association uses a two-dimensional loan rating model based on internally generated combined System risk rating guidance that incorporates a 14-point risk-rating scale to identify and track the probability of borrower default and a separate scale addressing loss given default over a period of time. Probability of default is the probability that a borrower will experience a default within 12 months from the date of the determination of the risk rating. A default is considered to have occurred if the lender believes the borrower will not be able to pay its obligation in full or the borrower is past due more than 90 days. The loss given default is management’s estimate as to the anticipated economic loss on a specific loan assuming default has occurred or is expected to occur within the next 12 months.

Each of the probability of default categories carries a distinct percentage of default probability. The 14-point risk rating scale provides for granularity of the probability of default, especially in the acceptable ratings. There are nine acceptable categories that range from a borrower of the highest quality to a borrower of minimally acceptable quality. The probability of default between 1 and 9 is very narrow and would reflect almost no default to a minimal default percentage. The probability of default grows more rapidly as a loan moves from a “9” to other assets especially mentioned and grows significantly as a loan moves to a substandard (viable) level. A substandard (non-viable) rating indicates that the probability of default is almost certain.

The allowance for credit losses is presented as an adjustment to the value of the loan portfolio for inherent credit losses related to the portfolio risk. The reserve for unfunded commitments takes into consideration potential losses related to unfunded commitments. These balances have been reclassified to a separate reserve for unfunded commitments, which is included in other liabilities on the Association’s Consolidated Statements of Condition. Transfers between the allowance for loan losses and the reserve for unfunded commitments can occur in conjunction with funding a seasonal line of credit or other loan and decreasing a related unfunded commitment or, conversely, receiving a loan payment and increasing a related unfunded commitment. Newly-executed loan commitments will also increase this liability. The provision for loan losses and the reserve for unfunded commitments are included together as part of the provision for credit losses on the Consolidated Statements of Comprehensive Income.

The credit risk rating methodology is a key component of the Association’s allowance for credit losses evaluation, and is generally incorporated into its loan underwriting standards and internal lending limit. The allowance for credit losses is maintained at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio. The allowance is increased through provision for credit losses and loan recoveries and is decreased through credit loss reversals and loan charge-offs. The allowance is based on a periodic evaluation of the loan portfolio by management in which numerous factors are considered, including economic conditions, environmental conditions, loan portfolio composition, collateral value, portfolio quality, current production conditions and prior loan loss experience. The allowance for credit losses encompasses various judgments, evaluations and appraisals with respect to the loans and

their underlying collateral that, by their nature, contain elements of uncertainty, imprecision and variability. Changes in the agricultural economy and environment and their impact on borrower repayment capacity will cause various judgments, evaluations and appraisals to change over time. Accordingly, actual circumstances could vary significantly from the Association's expectations and predictions of those circumstances. Management considers the following macro-economic factors in determining and supporting the level of allowance for credit losses: the concentration of lending in agriculture, combined with uncertainties associated with farmland values, commodity prices, exports, government assistance programs, regional economic effects and weather-related influences.

The allowance for credit losses includes components for loans individually evaluated for impairment and loans collectively evaluated for impairment. Generally, for loans individually evaluated, the allowance for credit losses represents the difference between the recorded investment in the loan and the present value of the cash flows expected to be collected discounted at the loan's effective interest rate, or at the fair value of the collateral, if the loan is collateral dependent. For those loans collectively evaluated for impairment, the allowance for credit losses is determined using the risk-rating model as previously discussed.

- B. Cash:** Cash, as included in the consolidated financial statements, represents cash on hand and on deposit at financial institutions. At times, cash deposits may be in excess of federally insured limits.
- C. Investment Securities:** The Association may hold investments in accordance with investment programs approved by FCA. Mortgage-backed securities issued by Farmer Mac are investments for which the Association has the intent and ability to hold to maturity and are classified as held-to-maturity and carried at cost.

Impairment is considered to be other-than-temporary if the present value of cash flows expected to be collected from the debt securities is less than the amortized cost basis of the security (any such shortfall is referred to as a "credit loss"). If an entity intends to sell an impaired debt security or is more likely than not to be required to sell the security before recovery of its amortized cost basis, the impairment is other-than-temporary and should be recognized currently in earnings in an amount equal to the entire difference between fair value and amortized cost. If a credit loss exists, but an entity does not intend to sell the impaired debt security and is not more likely than not to be required to sell before recovery, the impairment is other-than-temporary and should be separated into (i) the estimated amount relating to credit loss, and (ii) the amount relating to all other factors. Only the estimated credit loss amount is recognized currently in earnings, with the remainder of the loss amount recognized in other comprehensive income.

- D. Investment in CoBank:** The Association's required investment in CoBank is in the form of Class A Stock. The minimum required investment is 4.0% of the prior year's average direct loan volume. The investment in CoBank is comprised of patronage based stock and purchased stock.
- E. Premises and Equipment:** Land is carried at cost. For construction in progress, direct project costs are capitalized and the asset is not depreciated until the project is complete and placed into service. Premises and equipment are carried at cost less accumulated depreciation. Depreciation is provided on the straight-line method over the estimated useful lives of the assets. Useful lives for buildings is 30 years and ranges from 3 to 15 years for furniture, equipment and automobiles. Gains and losses on dispositions are reflected in current operating results. Maintenance and repairs are expensed and improvements above certain thresholds are capitalized.

- F. Other Assets and Other Liabilities:** Other assets are comprised primarily of accounts receivable, prepaid expenses, and investment in Farm Credit institutions. Significant components of other liabilities primarily include accounts payable, employee benefits, and the reserve for unfunded commitments.
- G. Advance Conditional Payments:** The Association is authorized under the Farm Credit Act to accept advance payments from borrowers. Such payments are presented as liabilities in the Consolidated Statements of Condition. Advance Conditional Payments are not insured. Interest is paid by the Association on such accounts. The Association offers conditional trust fund accounts for its borrowers. Access to such funds is restricted and as such, these funds are netted against the borrower's related loan balance.
- H. Employee Benefit Plans:** Substantially all employees of the Association participate in the Eleventh District Defined Benefit Retirement Plan (Defined Benefit Plan) and/or the Farm Credit Foundations Defined Contribution/401(k) Plan (Defined Contribution Plan). The Defined Benefit Plan is a noncontributory plan. Benefits are based on compensation and years of service. The Association recognizes its proportional share of expense and contributes its proportional share of funding. The Defined Benefit Plan was closed to employees hired after December 31, 1997.

The Defined Contribution Plan has two components. Employees who do not participate in the Defined Benefit Plan may receive benefits through the Employer Contribution portion of the Defined Contribution Plan. In this plan, the Association provides a monthly contribution based on a defined percentage of the employee's salary. Employees may also participate in a Salary Deferral Plan governed by Section 401(k) of the Internal Revenue Code. The Association matches a certain percentage of employee contributions. Employees hired on or after January 1, 1998 are eligible to participate only in the Defined Contribution Plan and Salary Deferral Plan. All defined contribution costs are expensed in the same period that participants earn employer contributions.

The Association also provides certain health and life insurance benefits to eligible current and retired employees through the Farm Credit Foundation Retiree Medical and Retiree Life Plans. Substantially all employees may become eligible for those benefits if they reach normal retirement age while working for the Association. The anticipated costs of these benefits are accrued during the period of the employee's active service. The authoritative accounting guidance requires the accrual of the expected cost of providing postretirement benefits during the years that the employee renders service necessary to become eligible for these benefits.

The Association also participates in the Eleventh District nonqualified defined benefit Pension Restoration Plan. This plan provides retirement benefits above the Internal Revenue Code compensation limit to certain highly compensated eligible employees. Benefits payable under this plan are offset by the benefits payable from the pension plan.

- I. Patronage Distributions:** Patronage distributions from CoBank are accrued by the Association in the year earned.
- J. Income Taxes:** As previously described, the ACA holding company conducts its business activities through two wholly owned subsidiaries. Long-term mortgage lending activities are operated through a wholly owned FLCA subsidiary which is exempt from federal and state income tax. Short- and intermediate-term lending activities are operated through a wholly owned PCA subsidiary. Operating expenses are allocated to each subsidiary based on estimated relative service. All significant transactions between the subsidiaries and the parent company have been eliminated in consolidation. The ACA, along with the PCA subsidiary, are subject to income taxes. The

Association accounts for income taxes under the liability method. Accordingly, deferred taxes are recognized for estimated taxes ultimately payable or recoverable based on federal, state or local laws.

The Association elected to operate as a cooperative that qualifies for tax treatment under Subchapter T of the Internal Revenue Code. Accordingly, under specified conditions, the Association can exclude from taxable income amounts distributed as qualified patronage refunds in the form of cash, stock or allocated retained earnings. Provisions for income taxes are made only on those earnings that will not be distributed as qualified patronage distributions. Deferred taxes are recorded on the tax effect of all temporary differences based on the assumption that such temporary differences are retained by the Association and will therefore impact future tax payments. A valuation allowance is provided against deferred tax assets to the extent that it is more likely than not (over 50% probability), based on management's estimate, the deferred tax assets will not be realized. The consideration of valuation allowances involves various estimates and assumptions as to future taxable earnings, including the effects of the Association's expected patronage program, which reduces taxable earnings.

Deferred income taxes have not been recorded by the Association on stock patronage distributions received from the Bank prior to January 1, 1993, the adoption date of accounting guidance on income taxes. Association management's intent is to permanently invest these and other undistributed earnings in the Bank, or if converted to cash, to pass through any such earnings to Association borrowers through qualified patronage allocations.

The Association has provided deferred income taxes on amounts allocated to the Association which relate to the Bank's post-1992 earnings. Deferred income taxes have not been provided on the Bank's post-1992 unallocated earnings to the extent that such earnings will be passed through to Association borrowers through qualified patronage allocations.

For California tax purposes, the Association can exclude from taxable income all patronage sourced income. Therefore, the provision for state income taxes is made only on non-patronage sourced taxable earnings.

K. Other Comprehensive Income/(Loss): Other comprehensive income refers to revenue, expenses, gains and losses that under GAAP are recorded as an element of shareholders' equity and comprehensive income but are excluded from net income. Accumulated other comprehensive income/(loss) refers to the balance of these transactions. The Association records other comprehensive income/loss associated with the liability under the Pension Restoration Plan (see Note 11).

L. Fair Value Measurement: Accounting guidance defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. It describes three levels of inputs that may be used to measure fair value:

Level 1 — Quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 assets include investments that are actively traded and have quoted net asset values that are observable in the marketplace. The Association holds no Level 1 investments.

Level 2 — Observable inputs other than quoted prices included within Level 1 that are observable for the asset or liability either directly or indirectly. Level 2 inputs include the following: (a) quoted prices for similar assets or liabilities in active markets; (b) quoted prices for identical or similar

assets or liabilities in markets that are not active so that they are traded less frequently than exchange-traded instruments, the prices are not current or principal market information is not released publicly; (c) inputs other than quoted prices that are observable such as interest rates and yield curves, prepayment speeds, credit risks and default rates; and, (d) inputs derived principally from or corroborated by observable market data by correlation or other means. The Association holds no Level 2 investments.

Level 3 — Unobservable inputs are those that are supported by little or no market activity and that are significant to the determination of the fair value of the assets or liabilities. These unobservable inputs reflect the reporting entity’s own assumptions about factors that market participants would use in pricing the asset or liability. Level 3 assets and liabilities include financial instruments whose values are determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. Level 3 assets include impaired loans and other property owned.

The fair value disclosures are presented in Note 15.

M. Off-balance-sheet Credit Exposures: Commitments to extend credit are agreements to lend to customers generally having fixed expiration dates or other termination clauses that may require payment of a fee. Commercial letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. These letters of credit are issued to facilitate commerce and typically result in the commitment being funded when the underlying transaction is consummated between the customer and third party. The credit risk associated with commitments to extend credit and commercial letters of credit is essentially the same as that involved with extending loans to customers and is subject to normal credit policies. Collateral may be obtained based on management’s assessment of the customer’s creditworthiness.

NOTE 3 – INVESTMENT SECURITIES:

The Association may hold FCA approved investments. The following table is a summary of investments, which are held-to-maturity and have contractual maturities in excess of 10 years (\$ thousands).

December 31, 2018					
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Weighted Average Yield
Mortgage-backed securities	\$ 14,183	\$ 12	\$ -	\$ 14,195	5.61%
Total	\$ 14,183	\$ 12	\$ -	\$ 14,195	5.61%

December 31, 2017					
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Weighted Average Yield
Mortgage-backed securities	\$ 18,655	\$ 185	\$ -	\$ 18,840	5.66%
Total	\$ 18,655	\$ 185	\$ -	\$ 18,840	5.66%

December 31, 2016

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Weighted Average Yield
Mortgage-backed securities	\$ 23,462	\$ 356	\$ -	\$ 23,818	5.33%
Total	\$ 23,462	\$ 356	\$ -	\$ 23,818	5.33%

The Association's mortgage-backed securities are all Farmer Mac. Farmer Mac securities are Agricultural Mortgage-Backed Securities which are pools of agriculture loans that have been securitized and guaranteed by Farmer Mac. Substantially all Farmer Mac securities have contractual maturities in excess of ten years. However, expected maturities for mortgage-backed securities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

NOTE 4 - LOANS AND ALLOWANCE FOR CREDIT LOSSES:

A summary of loans is provided in the following table as of December 31 (\$ thousands).

	2018	2017	2016
Real estate mortgage	\$ 2,219,658	\$ 2,049,385	\$ 1,898,901
Production & intermediate-term	602,868	493,172	414,633
Agribusiness	181,414	175,227	195,775
Rural residential real estate	2,101	2,697	2,792
Total	\$ 3,006,041	\$ 2,720,481	\$ 2,512,101

The Association purchases or sells loan participations with other parties in order to diversify risk, manage loan volume and comply with FCA regulations. The following table presents information regarding participations purchased and sold and the related accrued interest as of December 31, 2018 (\$ thousands).

	Other Farm Credit Institutions		Non-Farm Credit Institutions		Total	
	Purchased	Sold	Purchased	Sold	Purchased	Sold
Real estate mortgage	\$ 69,729	\$ 104,463	\$ 237	\$ -	\$ 69,966	\$ 104,463
Production & intermediate-term	57,462	20,759	2,895	-	60,357	20,759
Agribusiness	84,904	101,558	-	-	84,904	101,558
Total	\$ 212,095	\$ 226,780	\$ 3,132	\$ -	\$ 215,227	\$ 226,780

While the volumes shown in the previous tables represent the relative amounts of the Association's potential credit risk as it relates to recorded loan principal, a substantial portion of the Association's loans are collateralized. Accordingly, the Association's exposure to credit loss associated with lending activities is considerably less than the recorded loan balances. An estimate of the Association's current loss exposure is indicated in the Consolidated Statements of Condition in the allowance for loan losses.

The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but typically includes farmland and income-producing property, such as crops and livestock, as well as receivables. Long-term real estate loans are collateralized by first liens on the underlying real property. Federal regulations state that long-term real

estate loans are not to exceed 85% (97% if guaranteed or enhanced by a government agency) of the property's appraised value. However, a decline in a property's market value subsequent to loan origination or advances, or other actions necessary to protect the financial interest of the Association in the collateral, may result in loan to value ratios in excess of the regulatory maximum.

The Association has obtained credit enhancements by entering into Purchase Commitment Agreements (Agreements) with Farmer Mac covering loans with principal balances outstanding of \$333.8 million, \$336.4 million and \$195.0 million at December 31, 2018, 2017 and 2016, respectively. Under the Agreements, Farmer Mac agrees to purchase loans from the Association in the event of default (typically four months past due), subject to certain conditions, thereby mitigating the risk of loss from covered loans. In return, the Association pays Farmer Mac commitment fees based on the outstanding balance of loans covered by the Agreements. Such fees, totaling \$1.3 million in 2018, \$0.9 million in 2017, and \$0.7 million in 2016 are reflected as a reduction to interest income.

In addition to Farmer Mac, the Association has credit guarantees from Farm Service Agency for \$3.5 million, \$4.2 million and \$3.8 million for the years ending 2018, 2017 and 2016, respectively.

One credit quality indicator utilized by the Association is the Farm Credit Administration Uniform Loan Classification System that categorizes loans into five categories. The categories are defined as follows:

- Acceptable – assets are expected to be fully collectible and represent the highest quality;
- Other assets especially mentioned (OAEM) – assets are currently collectible but exhibit some potential weakness;
- Substandard – assets exhibit some serious weakness in repayment capacity, equity, and/or collateral pledged on the loan;
- Doubtful – assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable; and
- Loss – assets are considered uncollectible.

The following table shows loans and related accrued interest classified under the FCA Uniform Loan Classification system as a percentage of total loans and related accrued interest receivable by loan type as of December 31.

	2018	2017	2016
Real estate mortgage			
Acceptable	94.6%	94.2%	96.5%
OAEM	2.6	2.3	2.3
Substandard	2.8	3.5	1.2
Doubtful	0.0	0.0	-
Total	100.0%	100.0%	100.0%
Production & intermediate-term			
Acceptable	89.9%	90.0%	92.4%
OAEM	3.7	3.1	4.1
Substandard	6.4	6.9	3.5
Doubtful	0.0	0.0	-
Total	100.0%	100.0%	100.0%
Agribusiness			
Acceptable	98.3%	98.0%	98.5%
OAEM	0.0	-	-
Substandard	1.7	2.0	1.5
Total	100.0%	100.0%	100.0%
Rural residential real estate			
Acceptable	100.0%	100.0%	100.0%
OAEM	-	-	-
Substandard	-	-	-
Total	100.0%	100.0%	100.0%
All Loans			
Acceptable	93.9%	93.7%	96.0%
OAEM	2.7	2.3	2.4
Substandard	3.4	4.0	1.6
Doubtful	0.0	0.0	-
Total	100.0%	100.0%	100.0%

Impaired loans are loans for which it is probable that all principal and interest will not be collected according to the contractual terms. The following presents information relating to impaired loans including accrued interest, if any, as of December 31 (\$ thousands).

	2018	2017	2016
Nonaccrual loans:			
Current as to principal and interest	\$ 25,566	\$ 8,124	\$ 3,121
Past due	1,529	1,419	2,417
Total nonaccrual loans	27,095	9,543	5,538
Total impaired accrual loans	-	-	-
Total impaired loans	\$ 27,095	\$ 9,543	\$ 5,538

Commitments to lend additional funds to debtors whose loans were classified impaired were \$1.1 million at December 31, 2018. Such commitments have been considered when establishing the reserve for unfunded commitments, which is recorded in other liabilities on the Association's Consolidated Statements of Condition.

High risk assets consist of impaired loans and other property owned. These nonperforming assets (including related accrued interest) are as follows as of December 31 (\$ thousands).

	2018	2017	2016
Nonaccrual loans:			
Real estate mortgage	\$ 13,947	\$ 5,631	\$ 4,099
Production & intermediate-term	13,148	3,912	1,439
Total nonaccrual loans	27,095	9,543	5,538
Total impaired loans	27,095	9,543	5,538
Other property owned	-	-	-
Total high risk assets	\$ 27,095	\$ 9,543	\$ 5,538

Additional impaired loan information is as follows (\$ thousands).

December 31, 2018	Recorded Investment	Unpaid Principal Balance	Related Allowance	Average Impaired Loans	Interest Income Recognized
Impaired loans with a related allowance for credit losses:					
Real estate mortgage	\$ 5,892	\$ 5,892	\$ 247	\$ 491	\$ -
Production & intermediate-term	9,238	9,238	770	1,529	-

Note: The recorded investment in the loan receivable is the face amount increased or decreased by applicable accrued interest and unamortized premium, discount, finance charges, or acquisition costs and may also reflect a previous direct write-down of the loan receivable.

A restructuring of a debt constitutes a troubled debt restructuring if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. There were no restructurings of debt in any of the years presented.

The provision for loan losses and the reserve for unfunded commitments are included together as part of the provision for credit losses on the Consolidated Statements of Comprehensive Income. The allowance for loan losses is presented as an adjustment to the value of our loan portfolio for inherent credit losses related to portfolio risk. The reserve for unfunded commitments takes into consideration potential losses related to unfunded commitments. These balances have been reclassified to a separate reserve for unfunded commitments, which is included in other liabilities on the Association's Consolidated Statements of Condition.

A summary of changes in the allowance for loan losses and period end recorded investment in loans is as follows (\$ thousands).

	Balance at December 31, 2017	Charge- offs	Recoveries	Transfers (to) from Reserve for Unfunded Commitments	Provision for Credit Losses/ (Credit Loss Reversals)	Balance at December 31, 2018

NOTE 5 - INVESTMENT IN COBANK:

At December 31, 2018, the Association's investment in CoBank is in the form of Class A stock with a par value of \$100 per share. The Association is required to own stock in CoBank to capitalize its direct loan balance and participation loans sold to CoBank. The current requirement for capitalizing its direct loan from CoBank is 4.00 percent of the Association's prior year average direct loan balance. The current requirement for capitalizing patronage-based participation loans sold to CoBank is 8.00 percent of the Association's prior ten-year average balance of such participations sold to CoBank. Under the current CoBank capital plan applicable to such participations sold, patronage from CoBank related to these participations sold is paid 75 percent cash and 25 percent Class A stock. The capital plan is evaluated annually by CoBank's board of directors and management and is subject to change.

CoBank may require the holders of its equities to subscribe for such additional capital as may be needed to meet its capital requirements for its joint and several liability under the Farm Credit Act and regulations. In making such a capital call, CoBank shall take into account the financial condition of each such holder and such other considerations, as it deems appropriate.

The Association owned approximately 2.84 percent of outstanding common stock of CoBank at December 31, 2018.

NOTE 6 - PREMISES AND EQUIPMENT:

Premises and equipment consisted of the following as of December 31 (\$ thousands).

	2018	2017	2016
Land	\$ 2,784	\$ 2,784	\$ 2,784
Buildings and leasehold improvements	16,851	13,583	13,202
Furniture, equipment and automobiles	6,525	5,645	5,473
Construction in progress	213	3,004	240
Less: accumulated depreciation	(7,430)	(6,453)	(5,537)
Total	\$ 18,943	\$ 18,563	\$ 16,162

The Association is obligated under various noncancelable operating leases for office space and office equipment. At December 31, 2018, future minimum lease payments for all noncancelable leases are as follows (\$ thousands):

2019	\$138.6
2020	32.9
2021	2.5
Total minimum lease payments	\$174.0

NOTE 7 - NOTES PAYABLE TO COBANK:

The Association's indebtedness to CoBank represents borrowings by the Association to fund its loan portfolio. This indebtedness is collateralized by a pledge of substantially all of the Association's assets and is governed by a General Financing Agreement (GFA). The GFA and promissory note are subject to periodic renewals in the normal course of business. The GFA matures on December 31, 2022. Management expects renewal of the GFA at that time. The Association was in compliance with the terms and conditions of the GFA as of December 31, 2018. Substantially all borrower loans are match-funded with CoBank. Payments and disbursements are made on the note payable to CoBank on the same basis the Association collects payments from and disburses on borrower loans. The interest rate may periodically be adjusted by CoBank based on the terms and conditions of the borrowing. The weighted average interest rate was 2.72% for the year ended December 31, 2018, compared with 1.99% at December 31, 2017, and 1.52% at December 31, 2016.

Under the Farm Credit Act, the Association is obligated to borrow only from CoBank, unless CoBank gives approval to borrow elsewhere. CoBank, consistent with FCA regulations, has established limitations on the Association's ability to borrow funds based on specified factors or formulas relating primarily to credit quality and financial condition. At December 31, 2018, the Association's notes payable was within the specified limitations.

NOTE 8 – SHAREHOLDERS' EQUITY:

A description of the Association's capitalization, protection mechanisms, regulatory capitalization requirements and restrictions, and equities are provided below.

- A. Capital Stock and Participation Certificates:** In accordance with the Farm Credit Act, and association bylaws, each borrower is required to invest in the Association as a condition of borrowing. Currently the Association has a stock requirement of \$1,000 per customer.

The borrower normally acquires ownership of the stock at the time the loan is made, but usually does not make a cash investment. Generally, the aggregate par value of the stock is added to the principal amount of the related loan obligation. The Association has a first lien on the stock owned by its borrowers. At the discretion of the Board of Directors, retirement of such equities will generally be at the lower of par or book value, and repayment of a loan does not automatically result in retirement of the corresponding stock certificate.

- B. Regulatory Capitalization Requirements and Restrictions:** The Farm Credit Administration sets minimum regulatory capital requirements for Banks and Associations. Effective January 1, 2017, new regulatory capital requirements for Banks and Associations were adopted. These new requirements replaced the core surplus and total surplus requirements with Common Equity Tier 1, Tier 1 Capital and Total Capital risk-based capital ratio requirements. The new requirements also replaced the existing net collateral ratio for System Banks with a Tier 1 Leverage ratio and an Unallocated Retained Earnings (URE) and URE Equivalents Leverage ratio that are applicable to both the Banks and Associations. The Permanent Capital Ratio continues to remain in effect; however, the risk-adjusted assets are calculated differently than in the past.

The following sets forth the regulatory capital ratio requirements and ratios at December 31:

<u>Ratio</u>	<u>Primary Components of Numerator</u>	<u>Denominator</u>	<u>Ratios as of December 31, 2018</u>	<u>Ratios as of December 31, 2017</u>	<u>Minimum with Buffer*</u>	<u>Minimum Requirement</u>
Common Equity Tier 1 (CET1) Capital	Unallocated retained earnings (URE), common cooperative equities (qualifying capital stock and allocated equity) ¹	Risk-adjusted assets	14.10%	14.26%	7.0%	4.5%
Tier 1 Capital	CET1 Capital	Risk-adjusted assets	14.10%	14.26%	8.5%	6.0%
Total Capital	Tier 1 Capital and allowance for loan losses ²	Risk-adjusted assets	14.38%	14.55%	10.5%	8.0%
Tier 1 Leverage**	Tier 1 Capital	Total assets	14.51%	14.52%	5.0%	4.0%
Unallocated Retained Earnings and URE Equivalents (UREE) Leverage	URE and URE Equivalents	Total assets	16.82%	16.75%	—	1.5%
Permanent Capital	Retained earnings and common stock subject to certain limits	Risk-adjusted assets	14.14%	14.30%	—	7.0%

* The new capital requirements have a three-year phase-in of the capital conservation buffer applied to the risk-adjusted capital ratios. There is no phase-in of the leverage buffer. Amounts shown reflect the full capital conservation buffer.

** Must include the regulatory minimum requirement for the URE and UREE Leverage ratio.

¹ Equities outstanding 7 or more years

² Capped at 1.25% of risk-adjusted assets

The following table illustrates the capital ratios reported under prior FCA Regulations.

	2016
Permanent Capital Ratio	14.26%
Total Surplus Ratio	14.18%
Core Surplus Ratio	14.18%

If the capital ratios fall below the total requirements, including the buffer amounts, capital distributions (equity redemptions, dividends and patronage) and discretionary senior executive bonuses are restricted or prohibited without prior FCA approval.

An existing regulation empowers FCA to direct a transfer of funds or equities by one or more System institutions to another System institution under specified circumstances. This regulation has not been utilized to date. The Association has not been called upon to initiate any transfers and is not aware of any proposed action under this regulation.

- C. Description of Equities:** Each share of class C capital stock is entitled to a single vote by their designated voting stockholder. Other classes of borrower equities do not provide voting rights to their owners. Voting stock may not be transferred to another person unless such person is eligible to hold voting stock.

At December 31, 2018, the Association had 370,960 shares of class C common stock certificates outstanding, all at a par value of \$5.00 per share/unit.

The Association has the authority to issue other classes of stock, no shares of which are outstanding. The voting rights, duties and liabilities of such classes of stock are similar to those discussed above.

Losses that result in impairment of capital stock and participation certificates will be allocated to the classes of equity described above on a pro-rata basis. Upon liquidation of the Association, any assets remaining after the settlement of all liabilities will be distributed first to redeem the par value of equities. After these retirements, remaining assets will be distributed to holders of allocated surplus, on an equitable basis as determined by the Board. Any remaining assets after such distribution will be distributed to current and former Members and other Patrons in proportion to the volume or value of patronage business done with or for each such party.

- D. Patronage:** At each year end, the Board of Directors evaluates whether to retain the Association's net income to strengthen its capital position or to distribute a portion of the net income to customers by declaring a qualified/cash patronage refund. For 2018, the Association allocated 23% of its patronage-sourced net income to its patrons. The portion of patronage-sourced net income not distributed in cash is also allocated to patrons. In accordance with Internal Revenue Service requirements, each customer is sent a nonqualified written notice of allocation. Allocated, but not distributed patronage refunds, are included in the unallocated retained earnings account. The Board of Directors considers these unallocated retained earnings to be permanently invested in the Association. As such, there is no current plan to revolve or redeem these amounts. No express or implied right to have such capital retired or revolved at any time is granted.

- E. Accumulated Other Comprehensive Income/(Loss):** The Association reports accumulated other comprehensive income/(loss) in its Consolidated Statements of Comprehensive Income, and its Consolidated Statements of Changes in Shareholders' Equity. As more fully described in Note 2, other comprehensive income/(loss) results from the recognition of the Pension Restoration Plan's net unamortized gains and losses and prior service costs or credits. The Association has accumulated other comprehensive losses of \$6 thousand in 2018, \$48 thousand in 2017 and \$91 thousand in 2016. There were no other items affecting comprehensive income or loss.

NOTE 9 – PATRONAGE DISTRIBUTION FROM FARM CREDIT INSTITUTIONS:

Patronage income recognized from Farm Credit Institutions to the Association follows (\$ thousands).

	2018	2017	2016
CoBank			
Direct note	\$ 12,189	\$ 9,677	\$ 8,728
Participations	1,493	944	632
Other	178	90	44
Total	\$ 13,860	\$ 10,711	\$ 9,404

Patronage distributed from CoBank was in cash and stock. The amount earned in 2018 was accrued and will be paid by CoBank in March 2019. During the year ended December 31, 2018, CoBank declared a special one-time patronage distribution to share the benefits of federal tax reform legislation and earnings from significant non-recurring items in 2018 with member-borrowers. The Association's portion of the distribution was \$1.6 million, which was paid by CoBank in September 2018. The amount earned and accrued in 2017 was paid by CoBank in March 2018. The amount earned and accrued in 2016 was paid by CoBank in March 2017.

NOTE 10 – INCOME TAXES:

The provision for income taxes follows (\$ thousands).

	For the Year Ended December 31		
	2018	2017	2016
Current:			
Federal	\$ -	\$ -	\$ -
State	2	2	2
Deferred:			
Federal	-	-	-
State	-	-	-
Provision for income taxes	\$ 2	\$ 2	\$ 2

The provision for income tax differs from the amount of income tax determined by applying the applicable U.S. statutory federal income tax rate to pretax income as follows (\$ thousands).

	For the Year Ended December 31		
	2018	2017	2016
Federal tax at statutory rate	\$ 13,661	\$ 18,019	\$ 14,751
State Tax, net	2	2	2
Tax exempt income	(13,026)	(17,350)	(14,852)
Adjustments to deferred tax asset valuation allowance	130	(447)	501
Change in tax law/rates	-	292	-
Patronage distributions	(765)	(514)	(400)
Provision for income taxes	\$ 2	\$ 2	\$ 2

The provision for income taxes in 2017 included the benefit of \$291.7 thousand in net deferred tax adjustments resulting from the enactment of federal tax legislation in late December 2017 which, among other things, lowered the federal corporate tax rate from 35 percent to 21 percent beginning in 2018. In accordance with GAAP, the change to the lower corporate tax rate led to a revaluation of our deferred tax liabilities and deferred tax assets in the period of enactment (2017). The \$291.7 thousand net adjustment includes a \$662.7 thousand expense from the revaluation of deferred tax assets somewhat offset by a \$371.0 thousand benefit from the revaluation of deferred tax liabilities.

Deferred tax assets and liabilities are comprised of the following as of December 31 (\$ thousands).

	2018	2017	2016
Gross deferred tax assets:			
Allowance for credit losses	\$ 895	\$ 673	\$ 1,175
Loss carry-forwards	398	397	644
Gross deferred tax assets	1,293	1,070	1,819
Less: valuation allowance	601	471	918
Gross deferred tax assets, net of valuation allowance	692	599	901
Gross deferred tax liabilities:			
Patronage distributions from CoBank	(457)	(364)	(521)
Patronage refunds from CoBank	(235)	(235)	(380)
Gross deferred tax liabilities	(692)	(599)	(901)
Net deferred tax asset/(liability)	\$ -	\$ -	\$ -

The calculation of deferred tax assets and liabilities involves various management estimates and assumptions as to future taxable earnings including the amount of non-patronage income and patronage income retained. The expected future tax rates are based upon enacted tax laws.

The Association has a valuation allowance of \$601.2 thousand in 2018, \$471.3 thousand in 2017 and \$918.4 thousand in 2016. The Association will continue to evaluate the realizability of the deferred tax assets and adjust the valuation allowance accordingly. At December 31, 2018, the Association had federal and state net operating loss carry forwards that expire from 2026 to 2031.

The Association accounts for income taxes in accordance with ASC 740, which provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. ASC 740 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Association's tax returns to determine whether the tax positions are more-likely-than-not of being sustained upon examination by the applicable tax authority, based on the technical merits of the tax position, and then measuring the tax benefit that is more-likely-than-not to be realized. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax expense in the current reporting period. The Association did not have any positions for which it is reasonably possible that the total amounts of unrecognized tax positions will significantly increase or decrease within the next 12 months. The Association recognizes interest and penalties related to unrecognized tax positions as an adjustment to income tax expense. The Association has no uncertain tax positions to be recognized as of December 2018, 2017 or 2016. The tax years that remain open for federal and major state income tax jurisdictions are 2015 and forward.

NOTE 11 - EMPLOYEE BENEFIT PLANS:

Certain employees participate in the Eleventh District Retirement Plan, a multi-employer defined benefit retirement plan. The Department of Labor has determined the plan to be a governmental plan; therefore, the plan is not subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). As the plan is not subject to ERISA, the plan's benefits are not insured by the Pension Benefit Guaranty Corporation. Accordingly, the amount of accumulated benefits that participants would receive in the event of the plan's termination is contingent on the sufficiency of the plan's net assets to provide benefits at that time. This Plan is noncontributory and covers eligible employees. The assets, liabilities, and costs of the plan are not segregated by participating entities. As such, plan assets are available for any of the participating employers' retirees at any point in time. Additionally, if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers. Further, if the Association chooses to stop participating in the plan, it may be required to pay an amount based on the underfunded status of the plan, referred to as a withdrawal liability. Because of the multi-employer nature of the plan, any individual employer is not able to unilaterally change the provisions of the plan. If an employee moves to another employer within the same plan, the employee benefits under the plan transfer. Benefits are based on salary and years of service. There is no collective bargaining agreement in place as part of this plan.

The defined benefit pension plan reflects a total unfunded liability of \$61.9 million at December 31, 2018. The pension benefits funding status reflects the net of the fair value of the plan assets and the projected benefit obligation at the date of these consolidated financial statements. The projected benefit obligation is the actuarial present value of all benefits attributed by the pension benefit formula to employee service rendered prior to the measurement date based on assumed future compensation levels. The projected benefit obligation of the plan was \$253.9 million at December 31, 2018, \$271.1 million at December 31, 2017 and \$257.9 million at December 31, 2016. The fair value of the plan assets was \$192.0 million at December 31, 2018, \$200.7 million at December 31, 2017 and \$172.2 million at December 31, 2016. The amount of the pension benefits funding status is subject to many variables including performance of plan assets and interest rate levels. Therefore, changes in assumptions could significantly affect these estimates.

Costs are determined for each individual employer based on costs directly related to its current employees as well as an allocation of the remaining costs based proportionately on the estimated projected liability of the employer under this plan. The Association recognizes its proportional share of expense and contributes a proportional share of funding. Total plan expense for participating employers was \$1.9 million in 2018, \$3.6 million in 2017, and \$5.9 million in 2016. The Association's allocated share of plan expenses included in salaries and employee benefits was \$48.6 thousand in 2018, \$139.9 thousand in 2017, and \$226.8 thousand in 2016. Participating employers contributed \$16.0 million in 2018, \$16.0 million in 2017, and \$17.5 million in 2016 to the plan. The Association's allocated share of these pension contributions was \$0.4 million in 2018, \$0.6 million in 2017, and \$0.9 million in 2016. While the plan is a governmental plan and is not subject to minimum funding requirements, the employers contribute amounts necessary on an actuarial basis to provide the plan with sufficient assets to meet the benefits to be paid to participants. The amount of the total employer contributions expected to be paid into the pension plans during 2019 is \$16.0 million. The Association's allocated share of these pension contributions is expected to be \$0.7 million. The amount ultimately to be contributed and the amount ultimately recognized as expense as well as the timing of those contributions and expenses, are subject to many variables including performance of plan assets and interest rate levels. These variables could result in actual contributions and expenses being greater than or less than anticipated.

Postretirement benefits other than pensions are also provided through the Farm Credit Foundations Retiree Medical and Retiree Life Plans to eligible current and retired employees of the Association. Benefits provided are determined on a graduated scale, based on years of service. The anticipated costs of these

benefits are accrued during the period of the employee’s active service. Postretirement benefits expense (primarily health care benefits and life insurance) included in salaries and employee benefits were \$9 thousand in 2018, \$59 thousand in 2017, and \$39 thousand in 2016. These expenses are equal to the Association’s cash contributions for each year.

The Association participates in a non-qualified defined benefit Pension Restoration Plan that is unfunded. The plan provides retirement benefits above the Internal Revenue Code compensation limit to certain highly compensated eligible employees. Benefits payable under the Pension Restoration Plan are offset by the benefits payable from the Pension Plan. Pension Restoration Plan expenses included in salaries and employee benefits were \$44 thousand in 2018, \$44 thousand in 2017, and \$46 thousand in 2016.

The funding status and the amounts recognized in the Consolidated Statements of Condition for the Association’s Pension Restoration Plan follows (\$ thousands).

	2018	2017	2016
Change in benefit obligation			
Benefit obligation at the beginning of year	\$ 66	\$ 126	\$ 181
Interest cost	2	3	4
Actuarial (gain)/loss	-	(2)	1
Benefits paid	(62)	(61)	(60)
Benefit obligation at the end of the period	\$ 6	\$ 66	\$ 126
Funded status	\$ (6)	\$ (66)	\$ (126)
Net amount recognized – December 31	\$ (6)	\$ (66)	\$ (126)

Amounts recognized in the Consolidated Statements of Condition follows (\$ thousands).

	2018	2017	2016
Accrued benefit liability	\$ (6)	\$ (66)	\$ (126)
Net amount recognized	\$ (6)	\$ (66)	\$ (126)

The following table represents the amounts included in accumulated other comprehensive income/(loss) for the Pension Restoration Plan at December 31 (\$ thousands).

	2018	2017	2016
Unrecognized net actuarial loss	\$ 6	\$ 48	\$ 91
Total amount recognized in AOCI/loss	\$ 6	\$ 48	\$ 91

An estimated net actuarial loss of \$1 thousand for the Pension Restoration Plan will be amortized into income over the next year.

The projected and accumulated benefit obligation for the Pension Restoration Plan at December 31 was as follows (\$ thousands).

	2018	2017	2016
Projected benefit obligation	\$ 6	\$ 66	\$ 126
Accumulated benefit obligation	\$ 6	\$ 66	\$ 126
Fair value of plan assets	N/A	N/A	N/A

The net periodic pension expense for the Pension Restoration Plan included in the Consolidated Statements of Comprehensive Income is comprised of the following at December 31 (\$ thousands).

	2018	2017	2016
Components of net periodic benefit cost:			
Interest cost	\$ 2	\$ 3	\$ 4
Amortized unrecognized net actuarial loss	42	41	42
Net periodic cost	\$ 44	\$ 44	\$ 46

Changes in benefit obligation recognized in accumulated other comprehensive income are included in the following table (\$ thousands).

	2018	2017	2016
Current year actuarial (gain)/loss	\$ -	\$ (2)	\$ 1
Amortization of net actuarial gain	(42)	(41)	(42)
Total recognized in other comprehensive income	\$ 42	\$ 43	\$ 41

Weighted average assumptions used to determine benefit obligation at December 31:

	2018	2017	2016
Discount rate	3.81%	2.99%	3.20%
Rate of compensation increase	5.50%	5.50%	5.50%

Weighted average assumptions used to determine net periodic benefit cost for years ended December 31:

	2018	2017	2016
Discount rate	2.99%	3.20%	3.17%
Rate of compensation increase	5.50%	5.50%	5.50%

The Association does not expect to contribute to the pension restoration plan in 2019.

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid (\$ thousands).

Year	Pension Restoration Benefits
2019	\$ -
2020	\$ -
2021	\$ -
2022	\$ -
2023	\$ -
2024 – 2028	\$ 2

The Association also participates in the Farm Credit Foundations Defined Contribution/401(k) Plan (Contribution Plan). The Contribution Plan has two components. Employees who do not participate in the Pension Plan may receive benefits through the Employer Contribution portion of the Contribution Plan. In this plan, the Association provides a monthly contribution based on a defined percentage of the employee's salary. Employees may also participate in a Salary Deferral Plan governed by Section 401(k) of the Internal Revenue Code. The Association matches a certain percentage of employee contributions. Employer contributions to the Contribution Plans were \$1.6 million, \$1.5 million and \$1.3 million for the years ended December 31, 2018, 2017 and 2016.

NOTE 12 - RELATED PARTY TRANSACTIONS:

In the ordinary course of business, the Association enters into loan transactions with officers and directors of the Association, their immediate families and other organizations with which such persons may be associated. Such loans are subject to special approval requirements contained in the FCA regulations and are made on the same terms, including interest rates, amortization schedules and collateral, as those prevailing at the time for comparable transactions with unrelated borrowers.

The Association has a policy that loans to directors and senior officers must be maintained at an Acceptable or Other Assets Especially Mentioned (OAEM) credit classification. If the loan falls below the OAEM credit classification, corrective action must be taken and the loan brought back to either Acceptable or OAEM within eighteen months. If not, the director or senior officer must resign from the Board or employment.

Loan information to related parties for the years ended December 31 is shown below (\$ millions).

	2018	2017	2016
New loans/advances	\$ 39.6	\$ 36.3	\$ 30.1
Repayments	\$ 30.3	\$ 26.9	\$ 20.0
Other	\$ (22.7)	\$ 1.2	\$ (2.2)
Ending balance	\$ 59.8	\$ 73.2	\$ 62.6

In the opinion of management, none of the loans outstanding to officers and directors at December 31, 2018 involved more than a normal risk of collectability.

The Association also has business relationships with certain other System entities. The Association paid \$19.9 thousand in 2018, \$16.7 thousand in 2017 and \$12.8 thousand in 2016 to the Bank for operational services. The Association paid \$171.8 thousand in 2018, \$167.0 thousand in 2017 and \$160.3 thousand in 2016 to Foundations for human resource services.

NOTE 13 – REGULATORY ENFORCEMENT MATTERS:

There are no regulatory enforcement actions in effect for the Association.

NOTE 14 - COMMITMENTS AND CONTINGENCIES:

The Association has various commitments outstanding and contingent liabilities. With regard to contingent liabilities, there are no actions pending against the Association in which claims for monetary damages are asserted.

The Association has entered into Lease Partner Interim Funding Agreements (IFA) with Farm Credit Leasing Services Corporation (FCL). These interim funded transactions are those in which the related leased equipment must be built or constructed over a period of time and in which invoices are paid by FCL in advance of lease commencement. Under the IFA, the Association has agreed to Participate in the related lease once it commences resulting in off-balance-sheet risk. At December 31, 2018, \$3.2 million of commitments under IFA's were outstanding.

The Association may participate in financial instruments with off-balance-sheet risk to satisfy the financing needs of its borrowers and to manage their exposure to interest rate risk. These financial instruments include commitments to extend credit. The instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated financial statements. Commitments to extend credit are agreements to lend to a borrower as long as there is not a violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee by the borrower. At December 31, 2018, \$784.3 million of commitments to extend credit were outstanding, including \$3.2 million of letters of credit.

Since many of these commitments are expected to expire without being drawn upon, the total commitments do not necessarily represent future cash requirements. However, these credit-related financial instruments have off-balance-sheet credit risk because their amounts are not reflected on the Consolidated Statements of Condition until funded or drawn upon. The credit risk associated with issuing commitments is substantially the same as that involved in extending loans to borrowers and management applies the same credit policies to these commitments. Upon fully funding a commitment, the credit risk amounts are equal to the contract amounts, assuming that borrowers fail completely to meet their obligations and the collateral or other security is of no value. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the borrower.

During the year ended December 31, 2018, the Association entered into a contract for the construction of a new building for the Oakdale Branch. Capital expenditures under this contract are expected to be \$2.3 million in 2019.

NOTE 15 – FAIR VALUE MEASUREMENTS:

Accounting guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability. The fair value measurement is not an indication of liquidity. See Note 2 for additional information.

The Association has no assets or liabilities measured at fair value on a recurring basis for the periods presented. During the three years presented, the Association recorded no transfers in or out of Levels 1, 2, or 3.

Assets measured at fair value on a non-recurring basis at December 31 for the fair value hierarchy Level 3 values are summarized below (\$ thousands).

	Total Fair Value Level 3	Total (Losses)/Gains
Assets:		
2018		
Impaired loans	\$ 14,109	\$ (1,017)
2017		
Impaired loans	\$ 662	\$ (55)
2016		
Impaired loans	\$ 496	\$ (291)

Valuation Techniques

As more fully discussed in Note 2, accounting guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following presents a brief summary of the valuation techniques used by the Association for assets and liabilities subject to fair value measurement:

Loans: Fair value is estimated by discounting the expected future cash flows using the Association’s current interest rates at which similar loans would be made to borrowers with similar credit risk. The discount rates are based on the District’s current loan origination rates as well as management estimates of credit risk. Management has no basis to determine whether the estimated fair values presented would be indicative of the assumptions and adjustments that a purchaser of the Association’s loans would seek in an actual sale.

Fair value of loans in a nonaccrual status is estimated as described above, with appropriately higher interest rates, which reflect the uncertainty of continued cash flows. For noncurrent nonaccrual loans, it is assumed that collection will result only from the disposition of the underlying collateral. Fair value of these loans is estimated to equal the aggregate net realizable value of the underlying collateral, discounted at an interest rate, which appropriately reflects the uncertainty of the expected future cash flows over the average disposal period. Where the net realizable value of the collateral exceeds the legal obligation for a particular loan, the legal obligation is generally used in place of the net realizable value.

With regards to impaired loans, it is not practicable to provide specific information on inputs as each collateral property is unique. For certain loans evaluated for impairment under accounting impairment guidance, the fair value is based upon the underlying collateral since the loans are collateral-dependent loans for which real estate is the collateral. The fair value measurement process uses independent appraisals and other market-based information, market conditions, specific issues relating to the collateral and other matters. As a result, these fair value measurements fall within Level 3 of the hierarchy. When the value of the real estate, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established. The fair value of these loans would fall under Level 2 of the hierarchy if the process uses independent appraisals and other market-based information.

NOTE 16 – QUARTERLY FINANCIAL INFORMATION (UNAUDITED):

Quarterly results of operations for the years ended December 31, 2018, 2017 and 2016, follow (\$ millions).

	2018				
	First	Second	Third	Fourth	Total
Net interest income	\$ 18.8	\$ 18.9	\$ 19.8	\$ 20.5	\$ 78.0
Provision for credit losses	\$ 0.1	\$ 0.5	\$ 0.7	\$ -	\$ 1.3
Non-interest expense, net	\$ 2.5	\$ 3.6	\$ 1.7	\$ 3.8	\$ 11.6
Net income	\$ 16.2	\$ 14.8	\$ 17.4	\$ 16.7	\$ 65.1

	2017				
	First	Second	Third	Fourth	Total
Net interest income	\$ 16.2	\$ 16.8	\$ 17.9	\$ 17.9	\$ 68.8
Provision for credit losses/(Credit loss reversal)	\$ 0.4	\$ 0.3	\$ (0.3)	\$ (0.8)	\$ (0.4)
Non-interest expense, net	\$ 4.2	\$ 4.1	\$ 4.0	\$ 3.9	\$ 16.2
Net income	\$ 11.6	\$ 12.4	\$ 14.2	\$ 14.8	\$ 53.0

	2016				
	First	Second	Third	Fourth	Total
Net interest income	\$ 15.0	\$ 15.2	\$ 15.4	\$ 15.7	\$ 61.3
Provision for credit losses/(Credit loss reversal)	\$ (0.5)	\$ 0.6	\$ 0.8	\$ 1.3	\$ 2.2
Non-interest expense, net	\$ 4.3	\$ 3.8	\$ 3.9	\$ 3.7	\$ 15.7
Net income	\$ 11.2	\$ 10.8	\$ 10.7	\$ 10.7	\$ 43.4

NOTE 17 – SUBSEQUENT EVENTS:

In February 2019, the Association Board of Directors approved a resolution to distribute an additional 11% of 2018 patronage sourced income under the Association’s patronage program which is described in Note 8, “Shareholders’ Equity”. The additional cash patronage refund of \$7.2 million will be distributed in March 2019.

The Association has evaluated subsequent events through March 4, 2019 which is the date the financial statements were issued.

YOSEMITE FARM CREDIT, ACA DISCLOSURE INFORMATION

DESCRIPTION OF BUSINESS

The description of the territory served, persons eligible to borrow, types of lending activities engaged in, financial services offered, and related Farm Credit organizations required to be disclosed in this section is incorporated herein by reference to Note 1 of the consolidated financial statements, "Organization and Operations," included in this Annual Report to Shareholders.

The description of significant developments that had or could have a material impact on earnings or interest rates to borrowers, acquisitions or dispositions of material assets, material changes in the manner of conduct of the business, seasonal characteristics, and concentrations of assets, if any, required to be disclosed in this section, is incorporated herein by reference to, "Management's Discussion and Analysis," included in this Annual Report to Shareholders.

SELECTED FINANCIAL DATA

The selected financial data for the five years ended December 31, 2018, required to be disclosed in this section is incorporated herein by reference to the, "Five-Year Summary of Selected Consolidated Financial Data," included in this Annual Report to Shareholders.

MANAGEMENT'S DISCUSSION AND ANALYSIS

"Management's Discussion and Analysis," which appears on pages six through twenty-eight of this Annual Report to Shareholders, and is required to be disclosed in this section, is incorporated herein by reference.

FINANCIAL STATEMENTS

The financial statements, together with the report thereon of PricewaterhouseCoopers LLP dated March 4, 2019, appearing on page twenty-nine, and the Report of Management appearing on page three of this Annual Report to Shareholders, are incorporated herein by reference. The Board has been active in meeting its responsibility for the success of the Association. In meeting its responsibility for reliable financial information, the Board depends upon the representation of management, CoBank, ACB (the Bank) and the Association's system of internal audits and controls, as well as the results of independent audits. In 2018, the Association's financial statements were audited by PricewaterhouseCoopers LLP and the Association's operations and credit functions were reviewed by its own internal auditors and CoBank. The results of these audits were presented to the Audit Committee. In the opinion of management, the financial statements contained in this report fairly present the Association's year-end financial position, results of operations, and cash flows.

RELATIONSHIP WITH THE BANK

- The Association's statutory obligation to borrow from the Bank is discussed in Note 7 to the consolidated financial statements, "Notes Payable to CoBank," included in this Annual Report to Shareholders.
- The Bank's ability to access capital of the Association is discussed in Note 5 to the consolidated financial statements, "Investment in CoBank," included in this Annual Report to Shareholders.

- The Bank’s role in mitigating the Association’s exposure to interest rate risk is described in the Liquidity section of the Management’s Discussion and Analysis on page twenty-two.

DESCRIPTION OF PROPERTY

The following table sets forth certain information regarding properties of the Association.

Location:	Description:
800 W. Monte Vista Avenue Turlock, California	Administrative Branch Office Building and Land Ownership: 100% FLCA
806 W. Monte Vista Avenue Turlock, California	Administrative Branch Office Building and Land Ownership: 100% FLCA
810 W. Monte Vista Avenue Turlock, California	Turlock Branch Office Building and Land Ownership: 100% FLCA
345 W. Las Palmas Patterson, California	Patterson Branch Office Building and Land Ownership: 100% FLCA
1213 13 th Street Modesto, California	Modesto Branch Office Building and Land Ownership: 100% FLCA
178 South Maag Avenue Oakdale, California	Oakdale Branch Office Building Lessor: John Simvoulakis
G Street & Live Oak Oakdale, California	Oakdale Lot Office Building under construction and Land Ownership: 100% FLCA
530 Washington Los Banos, California	Los Banos Branch Office Building and Land Ownership: 100% FLCA
1732 O Street Merced, California	Merced Lot Land Ownership: 100% FLCA
760 W. 18 th Street Merced, California	Merced Branch Office Building and Land Ownership: 100% FLCA

DESCRIPTION OF LIABILITIES

The description of rights and obligations, and contingent liabilities required to be disclosed in this section is incorporated herein by reference to Notes 7 and 14 to the consolidated financial statements, "Notes Payable to CoBank," and "Commitments and Contingencies," included in this Annual Report to Shareholders.

DESCRIPTION OF CAPITAL STRUCTURE

Information required in this section is incorporated herein by reference to Note 8 to the consolidated financial statements, "Shareholders' Equity," included in this Annual Report to Shareholders.

LEGAL PROCEEDINGS AND ENFORCEMENT ACTIONS

Information required in this section is incorporated herein by reference to Note 14 to the consolidated financial statements, "Commitments and Contingencies," included in the Annual Report to Shareholders.

DIRECTORS

Farm Credit Administration (FCA) regulations require the disclosure of Directors' business experience for the last five years, other business interests on whose board the Director serves or where the Director serves as a senior officer, the name of the position held and the principal business in which the business is engaged, compensation and reimbursement received as an Association Director and certain other information. The following represents these disclosures for the Directors of Yosemite Farm Credit, ACA.

Dino Migliazzo, Director and Board Chair

Term of Office: 2018-2021

For the past five years Dino has been an owner/operator for Migliazzo & Sons Dairy, GP in the Atwater area. The business is principally involved in milk production. Dino also serves on the Merced College Ag-Advisory Committee.

Mark Jensen, Director and Board Vice-Chair

Term of Office: 2017-2020

For the past five years Mark's principal occupation has been a practicing attorney with Jensen & Jensen Attorneys in Modesto. His principal occupation also includes involvement with several farming entities. Mark is a director and holds an officer position in Patterson Nut Co., Inc., Patterson Nut Marketing Co., Inc., and J. Wilmar Jensen, Inc. Mark is a general partner in Jensen Brothers, Co., Draper Road Ranch, Jensen Family Fund, Hoyer Road Ranch, and Jensen & Jensen Investments. Mark is also a managing member of the Jensen Ranch Trucking, LLC, CJ Farming Co, LLC and DTOM, LLC. These businesses are principally involved in farming. Mark is a limited partner in the J. Wilmar & Judith A. Jensen Family Partnerships, LP. and a trustee of the Mark R. Jensen 2007 Separate Property Trust. Mark is also a member of the Newman Rotary Club, Stanislaus County Estate Planning Council, the McHenry Mansion Foundation, and a director/CFO for Ride for Mom, Inc.

Kenneth Bays, Director

Term of Office 2016-2019

For the past five years Ken has been a self-employed farmer in the Patterson area. Ken is a director and Vice-President with Bays Ranch Inc. He also owns/operates Bays Ranch Shredding Co. Ken is a trustee of the Kenneth and Michele Bays Revocable Trust. Ken is also a partner in M & B Farming, M & B Rentals, the Ivan E. & Eleanor D. Bays Real Property Partnership and a beneficiary of the Ivan E. and Eleanor D.

Bays Family Trust. These businesses are principally involved in diversified field and row crop farming. Ken also serves as the Board Member of the West Stanislaus Irrigation District, the Board Secretary for Westside Hulling Association, and a Board Member of the Apricot Producers of California. Ken serves on the Patterson High School and Modesto Junior College Ag Advisory Committees, a member of Stanislaus Farm Supply and the Chief for the Westley – El Solyo Volunteer Fire Department.

John Fiscalini, Director

Term of Office: 2016-2019

For the past five years, John has owned and operated Fiscalini Cheese Company, LP in Modesto. John also owns and operates the following entities in his capacity as trustee of the John Fiscalini Revocable Trust: Fiscalini Farms, LP; John Fiscalini Management Company, LLC; Fiscalini Farms Management, LLC; Fiscalini Properties, LP; Mathew B. Fiscalini Trust, and the Marie Fiscalini Family, LP. The businesses are principally involved in cheese making, farming, milk production, and electric generation. John is also an alumni of the California Ag Leadership Program.

Nancy Sill, Appointed Director and Audit Committee Chair

Term of Office: 2016-2019

Nancy, an outside director, was first appointed to the Board in 2007. She is an Instructional Dean and Instructor at Yosemite Community College District – Modesto Junior College, a Certified Public Accountant and a member of the Resource Allocation Council at Modesto Junior College. Nancy and her husband own/operate Westside Machine and Welding a California S Corporation in Patterson. Nancy is also a member of the Finance Council for Sacred Heart Catholic Church in Patterson and the Patterson High School Ag Advisory Committee. Nancy owns and manages a walnut orchard in the Patterson area.

Bruce Burroughs, Director

Term of Office: 2017-2020

For the past five years Bruce has been a dairyman and almond grower in the Denair area. Bruce is a director and holds an officer position for the California Livestock Producers (Self-Insured Group) and Burroughs Management Inc. Bruce is also a general partner/voting member with Sierra Vista Dairy, LP, B&B Burroughs Ranches, LP, BruBar Properties, LLC, and B&B Pastures. Bruce is also a trustee of the B&B Burroughs Revocable Trust. The businesses are principally involved in milk production, tree nuts and commercial property ownership.

Alicia Madsen, Appointed Director and Audit Committee Vice-Chair

Term of Office: 2017-2020

Alicia, an outside director, was first appointed to the Board in November 2015. From 2002 to 2013 she was in the commercial banking industry. Alicia now works for a construction and design company and manages an almond orchard in the LaGrange area. Alicia is also involved with the Bank of America Emerging Leader Program.

Brian Genzoli, Director

Term of Office: 2018-2021

For the past five years Brian has been a self-employed farmer in the Turlock area, and his business is principally involved in the farming of almonds. Brian is also a trustee of the Brian and Linda Genzoli Revocable Trust. Brian is a Board Member of the Turlock Rural Fire District. Brian is also a member of the Blue Diamond Growers, and the Stanislaus Farm Bureau.

Rick Scheuber, Director

Term of Office: 2018-2021

For the past five years Rick has been a self-employed farmer in the Patterson area. Rick is also a trustee of the Alfred J. Scheuber and Betty J. Scheuber Revocable Trust and a managing member of Scheuber Farms, LLC. The business is principally involved in diversified field and row crop farming. Rick is also a District Farm Credit Council Board Member.

SENIOR OFFICERS

FCA regulations also require the following disclosure of the business experience for the last five years for each senior officer, other business interests on whose board the senior officer serves or where the senior officer serves as another senior officer, the name of the position held and the principal business in which the business is engaged.

Leonard Van Elderen, President and Chief Executive Officer

Leonard has served as the Chief Executive Officer and President for the past ten years and prior to the appointment as President, he served as the Chief Credit Officer for the previous seven years. Leonard has a total of thirty-seven years of Farm Credit experience.

Tracy V. Sparks, Executive Vice-President, Chief Operating Officer

Tracy is a CPA and has served as the Chief Operating Officer for the past ten years. Tracy also served as the Chief Financial Officer for twenty-four years until July 1, 2018 and has a total of twenty-five years of Farm Credit experience.

Leslie C. Crutcher, Executive Vice-President and Chief Credit Officer

Leslie (Les) has served as the Chief Credit Officer for the past ten years and prior to being selected as Chief Credit Officer he served as a Corporate Lending Executive and Loan Officer for the Association. Les has a total of twenty years of Farm Credit experience.

James C. Connelly, Executive Vice-President and General Counsel

James (Jim) has served as the General Counsel for the past thirteen years and has a total of thirty-two years of Farm Credit experience.

Matthew R. McNelis, Senior Vice-President, Chief Financial Officer and Treasurer

Matthew (Matt) is a CPA and has served as the Chief Financial Officer and Treasurer since July 1, 2018. Matt has over twenty years of experience in finance and accounting, the last three with Farm Credit.

COMPENSATION OF DIRECTORS AND SENIOR OFFICERS

Directors are compensated for their services as follows: An honorarium of \$600 per month, except the Board Chair who receives \$1,000 per month, in addition to compensation for committee meetings of \$400 per day or \$200 per half day. The Appointed Directors receive honorariums of \$1,100 per month except the Audit Chair who receives \$1,500 per month in addition to compensation for committee meetings of \$800 per day or \$400 per half day. The total compensation paid to Directors in 2018 amounted to \$156,800. Directors are also reimbursed for mileage, and documented business expenses while serving in an official capacity. No individual director received more than \$5,000 in non-cash compensation during the reporting period.

<u>Name</u>	<u>Years of Service</u>	<u>Number of Days Served at Board Meetings</u>	<u>Number of Days Served in Other Official Activities</u>	<u>Total Compensation Paid During 2018</u>
Kenneth Bays	5	9	6.5	\$13,200
Bruce Burroughs	4	10	7.5	\$14,000
John Fiscalini	14	9	2.5	\$11,400
Brian Genzoli	12	10	4	\$12,600
Mark Jensen	4	9	8.5	\$14,000
Alicia Madsen	3	9	3.5	\$22,800
Dino Migliazzo	24	10	12.5	\$20,600
Rick Scheuber	24	10	15	\$17,000
Nancy Sill	11	9	8.5	\$31,200

The Association has a travel policy that provides for reimbursement of reasonable travel, subsistence and related expenses of directors and employees when on official Association business. A copy of the Association's travel policy is available to stockholders upon request. The following amounts of total director reimbursement for travel, subsistence and related expenses was \$12,049, \$13,997, and \$18,937, for 2018, 2017 and 2016, respectively.

CEO and other senior officer compensation disclosures have been included in the Association Annual Meeting Information Statement (AMIS) mailed to all voting shareholders. Any noncash compensation with an annual aggregate value of \$5,000 or more is included in total compensation paid to the CEO and other senior officers. Disclosure of total compensation paid during the last fiscal year to any senior officer or any other officer included in the aggregate disclosures contained in the AMIS will be disclosed to Association shareholders upon request. The AMIS is available for public inspection at the Association's offices upon request.

TRANSACTIONS WITH SENIOR OFFICERS AND DIRECTORS

The Association's policies on loans to and transactions with its senior officers and Directors, required to be disclosed in this section, are incorporated herein by reference from Note 12 to the consolidated financial statements, "Related Party Transactions," included in the Annual Report to Shareholders. No loans to Directors or senior officers, their immediate families and affiliated organizations involved more than a normal risk of collectability during 2018. The Association did not conduct any other type of transactions with Senior Officers or Directors.

INVOLVEMENT OF DIRECTORS AND SENIOR OFFICERS IN CERTAIN LEGAL PROCEEDINGS

There were no matters which came to the attention of management or the Board of Directors regarding involvement of current Directors or senior officers in specified legal proceedings, which are required to be disclosed in this section.

RELATIONSHIP WITH INDEPENDENT AUDITOR

There were no changes in independent auditor since the prior Annual Report to Shareholders and there were no material disagreements with our independent auditor on any matter of accounting principles or financial statement disclosures during this period.

ASSOCIATION POLICIES

The Association has an affirmative action policy in place which is available upon request. A copy of the policy may be requested at our administrative branch at 806 W. Monte Vista Ave., Turlock, CA or by calling (209) 667-2366 during business hours Monday – Friday, 8 a.m. – 5 p.m. PST.

BORROWER PRIVACY

Your privacy is important to us. We want you to know that we hold your financial and other personal information in strict confidence. Since 1972, the Farm Credit Administration regulations have forbidden the directors and employees of Farm Credit institutions from disclosing personal borrower information to others without your consent. We do not sell or trade our customers' personal information to marketing companies or information brokers.

FCA rules allow us to disclose customer information to others only in these situations:

- We may give it to another Farm Credit institution that you do business with.
- We can be a credit reference for you with other lenders and provide information to a credit bureau or other consumer reporting agency.
- We can provide information in certain types of legal or law enforcement proceedings.
- We may provide information to auditors for the purpose of confirming loan balances and terms.
- FCA and other third-party examiners may review loan files during regular examination of our Association.
- If one of our employees applies to become a licensed real estate appraiser, we may give your copies of real estate appraisal reports to the State agency that licenses appraisers when required. We will first remove as much personal information from the appraisal report as possible.

As a member of this institution, your privacy and security of your personal information are vital to our continued ability to serve your ongoing credit needs.
